

When a "virus" came along it made us stop & think. After some time  of introspection

We came to a **BIG** realization. That we all are in this together and that our fates are

intertwined. We understood that if a "virus"

spreads socially, it can equally be contained socially. Our eyes  started to see the

"particles" in the air that carried it from one person to another. Particles or waves, the

duality that is true for light, we pictured in our minds for  sound)))) too. Such as with the sounds we make generating words.

We could hear their waves and we could see their particles which can carry the infectious "virus" of dangerous ideas. We could be the ones spreading them or we could be the "Anti-Virus"

 ping their spread. **REALIZING** this

duality  we stopped a pandemic of dangerous ideas.
