brunner ::

Passion. It inspires,
shifts boundaries
and above all
it is the force
that drives us to go on
tirelessly even in un-
precedented times.

Dear reader,

A pandemic means a new form of reality. A new way of living and working and this is reflected to some extent in our new products.

Although we were unable to meet this year at trade fairs in Cologne, Langenthal and Paris, we would like to provide you with some insight into our current development projects in this edition of Design News.

These include thirteen new collections, product ranges and additions to existing product families, sometimes with up to nine different versions. A variety of materials, shapes, colours and details you would not necessarily see straight away – but you feel them within seconds.

In recent months, the focus here at Brunner has also been on values such as solidarity, team spirit and family in particular. But we have in no way forgotten the beautiful things: innovative design, sustainable materials and the desire to create an atmosphere that invites people to linger just that little bit longer.

We look forward to being able to present our new concepts in person at the Brunner Design Days next spring.

pads
jehs+laub

PADJ PLAYFULLY INCORPORATES DIFFERENT STRUCTURES TO CREATE INTERESTING NEW APPROACHES TO SITTING, WORKING AND COMMUNICATING.

jehs+laub

Everything goes together here. **Nine elements** that can be combined in new ways again and again. And, whichever fabric variant you choose, the pads are an eye-catching feature, inviting you to rest a while. As a key design element, the characteristic **zigzag seam** not only provides a consistent link, it also represents a passion for detail. And if the various elements still don't provide enough choice, the modular seating landscape can be expanded to include all versions. The panel and the electrifiable side table then really combine everything together.

pads

ray table flex

jehs+laub

That's what we should talk about: The ray table flex, as an expansion of the ray collection, combines with its **modular concept** familiar high-end workmanship with maximum mobility. Its **variably positionable legs** can be adapted to perfection both in look and table depth. Add plenty of legroom and optional electrification and you get the ideal companion for any seminar and conference room. Bringing everyone to the same table.

RAY TABLE FLEX TAKES THE RAY TABLE TO THE NEXT LEVEL.
WE HAVE DESIGNED A MODULAR SYSTEM TO ALLOW FOR FULL
FLEXIBILITY IN TABLE LENGTH AND DEPTH.

RAY TABLE FLEX

Rarely has there
been such harmony
within a family.

DESIGN NEWS

The desire to go beyond perfection lies in our genes here at Brunner. That's why we have added new highlights to the existing crona models. **Height-adjustable central foot frames made of die-cast aluminium** that slip underneath the seat shell, either chromed or coated, as desired. They are available in either a four-foot version on glides or a five-foot version on casters. There is also the option to keep the feet stationary.

DESIGN NEWS

CRONA LIGHT LOUNGE

We weren't looking to design a large chair, but some kind of nest, a smooth and welcoming shape that would inspire the pleasure of seating.

Eventually the result really made us proud. Crona light lounge is a very simple object that finds its place in every style of furnishing, thanks to all of its configuration options.

Archirivolto

crona light lounge

Comfort looks good in any setting – and crona light lounge adds to this pleasant oasis of tranquillity. Since relaxation can look quite different from person to person, the different frame versions of **wood**, **steel**, **central foot** and **sled-base** can be combined with the various back-friendly shell options as desired. We are forging new paths here: with its **wide shell** and the **soft upholstered design** featuring a particularly supple and comfortable cushion, crona light lounge is proving a highly competitive seating option in all settings.

Sometimes, there is only one way: multi-way.

crona light eco

Archirivolto

Our Crona Light Eco is always green. Its recycled plastic shell saves on resources and gives it its unique colour. In the true spirit of maximum sustainability without even the slightest compromise in comfort.

DESIGN NEWS

A high-quality, 100% recycled plastic forms the raw material.

CRONA LIGHT ECO

Crona Light Eco in the three new colours of pebble, onyx and agave.

DESIGN NEWS

Just because you love to be comfortable doesn't mean you don't want to move. That's why Crona Up is the perfect partner for your agile workplace. To make sure you stay as flexible as possible, it rolls wherever you need it – **with or without backrest**. And if you want to go one step further in terms of seating comfort: In addition to the **adjustable high chair version with foot rest**, a **low stool version** is also available. Move on up!

Steel supports
can be so elegant.

crona steel

CRONA STEEL

The new addition to the banc range shields you perfectly to ensure complete privacy for your transatlantic web chat. And if your counterpart is present in person, the **single seats with writing tablet** create a room inside a room – wherever peace and quiet is called for. Perfect for central areas in offices or waiting rooms that need to be transformed into fully upholstered meeting rooms in a flash.

nate

Atelier Steffen Kehrle

nate

WE WANTED TO DESIGN A CHAIR FOR ROOMS WITH POSITIVE VIBES. BUT WE ACTUALLY ENDED UP WORKING WITH BRUNER FOR THREE YEARS AND TAKING THIS CONCEPT EVEN FURTHER TO CREATE A SMART AND INNOVATIVE PRODUCT RANGE.
NATE

Atelier Steffen Kehrle

Sometimes life can be that simple: everything fits together perfectly and nothing else is needed. Thus, the new nate range combines the latest plywood technology and manufacturing techniques with **sustainable materials** – without using any glue. The sophisticated combination with a **recycled plastic frame** guarantees outstanding stability and a low inherent weight. By developing nate, we have created a groundbreaking, stackable and robust union of nature and technology. Using genuinely high-end materials – for wooden furniture that feels most comfortable in company.

nate

Discreetness
with attitude.

nate s

Atelier Steffen Kehrle

DESIGN NEWS

nate s breaks conventions in many ways. On the other hand: Who says that thinly processed plywood does not provide stability? Or that the latest production technology cannot create timeless classics? In nate s, a **laser-cut steel tube with ecological powder coating** creates the supporting structure – without losing any of the stability or efficiency of its conventional counterparts. Making it the perfect fit for any architecture. Pleasingly unconventional.

Steel is transformed
into a precious metal
here.

team

jehs+laub

One of the most important aspects in offices nowadays: keeping distance. And to make sure this is achievable with style even in public spaces, the new additions to the team range can be used as protective barriers for optimum hygiene standards. In addition to the Perspex versions (transparent or tinted), it is also available with innovative HPL Polyrey finish with antibacterial protection. Plus: for the perfect fusion of new work and the new normal, both sides of team can be written on. Here's to a successful collaboration!

In large spaces or seminar environments: at Brunner, networking is so much more than just a get together. With hero plus, you welcome a well-connected, breathable everyday hero, available in up to six colours, into your company. Its **elasticated mesh material** moulds superbly to any body shape – while still holding its tension. Optionally available with flame retardant mesh as well. You should get acquainted.

This clever combination of a flexible frame and mesh material ensures maximum comfort and transparency.

New: the seat and back as separate elements create a visually simple appearance.

first place

Brunner Design Team

numera evo – the contactless evolution of our electronic seat numbering system.

In any row, first place is the perfect choice for any event. This row linking chair scores highly thanks to its barely visible connections. The versions **with and without an armrest** can be combined as required and connected invisibly. What's more, with our **numera evo** electronic seat numbering system, customisation even extends beyond the seat itself. The **battery-free display**, based on sustainable e-paper, shows numbers and, if required, also your logo. But now, eyes forward.
