

INVESTMENT OBJECTIVE

The portfolio looks to deliver long-term capital growth with a balanced approach between lower risk assets such as cash and fixed income, and higher risk assets such as equities.

INVESTMENT STRATEGY

The portfolio manager will invest in a diversified portfolio of assets including equities, bonds, commercial property and cash to deliver long-term returns without compromising investors' tolerance for risk.

The portfolio manager will invest in low-cost passive strategies that are designed to track the performance of indices such as the S&P 500 Index and the Barclays Global Bond Index to give exposure to a variety of asset classes across a diversified range of global markets. Our focus is on long-term minimal fee impact on the portfolio.

PORTFOLIO RISK RATING

Risk is based on the standard deviation of returns. Standard deviation measures the dispersion of returns around the average (i.e. volatility. High volatility does not necessarily result in higher returns).
