

SAFETY INNOVATOR CAMBODIA

Safety Innovator Role

Your role as Safety Innovator will be key to enable Safetyknot to expand our reach and increase our impact in Cambodia. As Safety Innovator, you will support with seeking new partnerships and collaborations, growing our training offerings, and support with operations, translation and logistics. Please note that you will primarily be working remotely, so you need to be confident that you have the focus, drive and self-discipline required to work independently and meet deadlines.

Your Qualities & Experience

At Safetyknot we value potential as well as experience. Our key priority is to include team members who are truly passionate about making the world a safer place. To be successful in the Safety Innovator role, you will be an:

- Independent and responsible worker with lots of motivation
- Take initiative and be an innovative thinker
- Be a fantastic communicator (ideally with experience in translation (verbal and written) and working remotely with teams)
- Be confident to set up and conduct meetings
- Be fluent in both Khmer and English (both written and verbal)
- Likely be studying for or have a degree / or have equivalent & relevant experience

Key Activities

Whilst this role does require someone who is able to work independently, it should be noted that a detailed workplan will be provided and regular support will be given. The activities below are intended to provide an indication of likely activities, but these are subject to change to reflect evolving need.

Communications

- Collect content for social media and website (including photos, videos and quotes)
- Support with the development and posting of social media and website
- Support with the development of communication content such as infographics
- Support with printing Safetyknot materials if required

Training

- Support with research into expansion of training topics
- Support with training as and when required (such as logistics for training, translation etc)
- Support with collection of feedback and testimonials from trainees

- Provide training support

Partnerships

- Attend relevant meetings as the Safetyknot representative as and when required

Research

- In person research, conducting FGDs, interviews and safety product research
- On-line research activities about injury, safety and other related information

Working hours

This role is a part time role and hours can be spread throughout the week (as long as any deadlines are met). You must be able to access a laptop/computer and submit a timesheet.

How to apply

If you'd like to become Safetyknot's Safety Innovator, follow these steps!

- Write up to 400 words in English telling us why you are passionate about safety promotion and injury prevention in Cambodia, and what would make the greatest Safety Innovator EVER!

info@safetyknot.org

- Only shortlisted candidates will be contacted for a video call interview.

Only candidates who follow these steps will be considered for the position.
