Heavy Cast Aluminum

POWER:

120 VAC, or other

DIMENSIONS:

Height: 9.5 Inches
Width: 19 Inches
Length: 19 Inches
Weight: 38 Pounds

FINISH:

Polyester Powder Coating, Orange

Heliports within the U.S.: Care should be taken to place floodlights clear of the TLOF, the FATO, the safety area, the approach/departure surfaces, and any required transitional surfaces.

MODEL 702

Surface Floodlight with Flushlight in Cover

Additional part of the 700 series

The Model 702 does double duty

Floodlights the area without glare, plus it is one of the omnidirectional Green Perimeter Lights. The Flushlight has an optically designed non-breakable plastic (Lexan) lens, that is omnidirectional and whose beam will help the pilot stay on his glide path as he descends to land.

The Model 702 Floodlight will meet ICAO standards as a combined floodlight and FATO perimeter light where the FATO is load bearing.
