

## OBSTRUCTION LIGHTS

Single - Models OB20 LED

### MODEL OB20 LED

Our OB20 LED obstruction lights provide an LED based solution to the FAA L-810 style of steady-burning lights. The OB20 LED is currently available in both single and dual configurations operating at 120, 240 & 277 VAC or 12/24/48 VDC. Each configuration is available as original equipment or as direct lens/lamp field retrofit to existing L-810 obstruction lights.

#### Specifications:

- LED obstruction light lasts up to 20 times longer than an incandescent light.
- 95% less power than an equivalent incandescent light.
- 6-watts power consumption.
- Available in both single and dual configurations with side or bottom conduit outlets.
- Weather/corrosion resistant.
- Self contained wiring compartment eliminates additional boxes.
- Can be operated as a steady-burning (ETL Certified) or flashing light.
- Resistant to shock and vibration.
- Direct replacement for existing incandescent lighting.
- 5 year warranty.
