

**TIME INTELLIGENCE
FOR LAW FIRMS**

TIME INTELLIGENCE FOR LAWYERS

Zepto is an intelligent timekeeping software for law firms. It works by integrating with devices and systems that attorneys use daily and tracking the time spent on emails, meetings, documents and research.

Capturing every single activity with digital timers, spreadsheets and clunky practice management solutions is costing you money.

Zepto fixes this problem by recording your billable activities automatically, and matching them with the right matters and clients.

The goal is to automate the time recording process inside law firms and understand where time is being spent, leading to increased revenues and enhanced productivity.

BENEFITS

What we do best

CAPTURE AND RECORD MORE WORK

By using passive time-capture features and timekeeping prompts, Zepto can dramatically reduce leakage and increase the number of billable hours. Zepto captures activity done on desktop and mobile devices, allowing firms to increase their billable hours and be fully compensated for their efforts.

IMPROVE REALIZATION AND UTILIZATION

The software helps law firms better understand and honor client requirements. It reduces billing errors and gathers data to run their businesses more efficiently.

ACCELERATE WORK-TO-COLLECT CYCLE

Zepto improves the efficiency of time entry and billing processes. By reducing write-downs, client queries, and e-billing rejections, firms are able to dramatically shrink the interval from time worked to payment received.

THE BEST TIMEKEEPING SOFTWARE FOR THE MODERN LAW FIRM

Through timekeeping, we help you to understand how work is being done and give you insights that support data-backed strategic decisions

Knowing in real-time what is happening across the firm, learning efficiencies and effectiveness at new levels of detail and accuracy, and correlating this to the client experience is essential to a modern law firm.

By accurately capturing data about where time is spent, Zepto helps firms price the alternative fee arrangements and understand the discounts you can offer to clients. This ensures that you are always profitable while making sure that client relationships improve dramatically.

Inaccurate time entries bring inaccurate budgeting, which drives clients crazy. With data insights, law firms get predictability and transparency which is what clients want and value. This is how Zepto becomes a win-win-win for all the parties involved.

Zepto is a tool built for the lawyer. We focused on design and ease-of-use, so that interacting with our solution will feel like a breeze. Time has come for legal software to offer the same experience to lawyers as consumer apps.

ENTERPRISE SETUP - THE MANAGEMENT ACCOUNT

For larger law firms, we have introduced the management view.

Our artificial intelligence technology is able to detect billable time automatically, assign it to the right project and send it directly to the management account for approval.

Partners and project leads can add supporting staff to the relevant matters. Everyone in the team – paralegals, associates, senior associates – will have their time tracked automatically by Zepto, but will only be able to release the time to the management account, or project lead.

Based on billing history, client relationship and other data points, Zepto will predict a discount that can be offered to the clients, without affecting the profitability of the project. The project lead can accept, edit or decline the discount.

Zepto is partnering with the largest practice management and billing tools out there, so the invoices will be sent directly to the financial management system, making the process as efficient as possible.

FEATURES

SECURE DATA

We believe that data protection is people's protection. It is our duty to comply with the various legal regulations that govern the collection and processing of personal data. Our top priority is to ensure universally applicable, worldwide standards for handling personal data.

PASSIVE TIME-CAPTURE

Do what you are great at and let Zepto build your timesheet in the background, without interfering with your work. At the end of the billing cycle, you can release the timesheet directly to billing and practice management tools.

INSTANT ONBOARDING

Integrations into your workflow and the software's superb design get you up and running in minutes.

KNOWLEDGEABLE PRICING

More accurate and structured time data fuel your pricing tools. Zepto allows you to provide alternative fees and discounts for your clients, without losing profits.

STATE-OF-THE-ART ALGORITHMS

Zepto uses artificial intelligence to analyze and understand the way each lawyer works, and automatically builds timesheets for their review.
