

01)

Hide location information behind a read more button on the one option date screen.

02)

Remove the "propose a new plan" button and replace it with a popout on the edit button that allows you to either edit some pieces or do a new plan entirely.

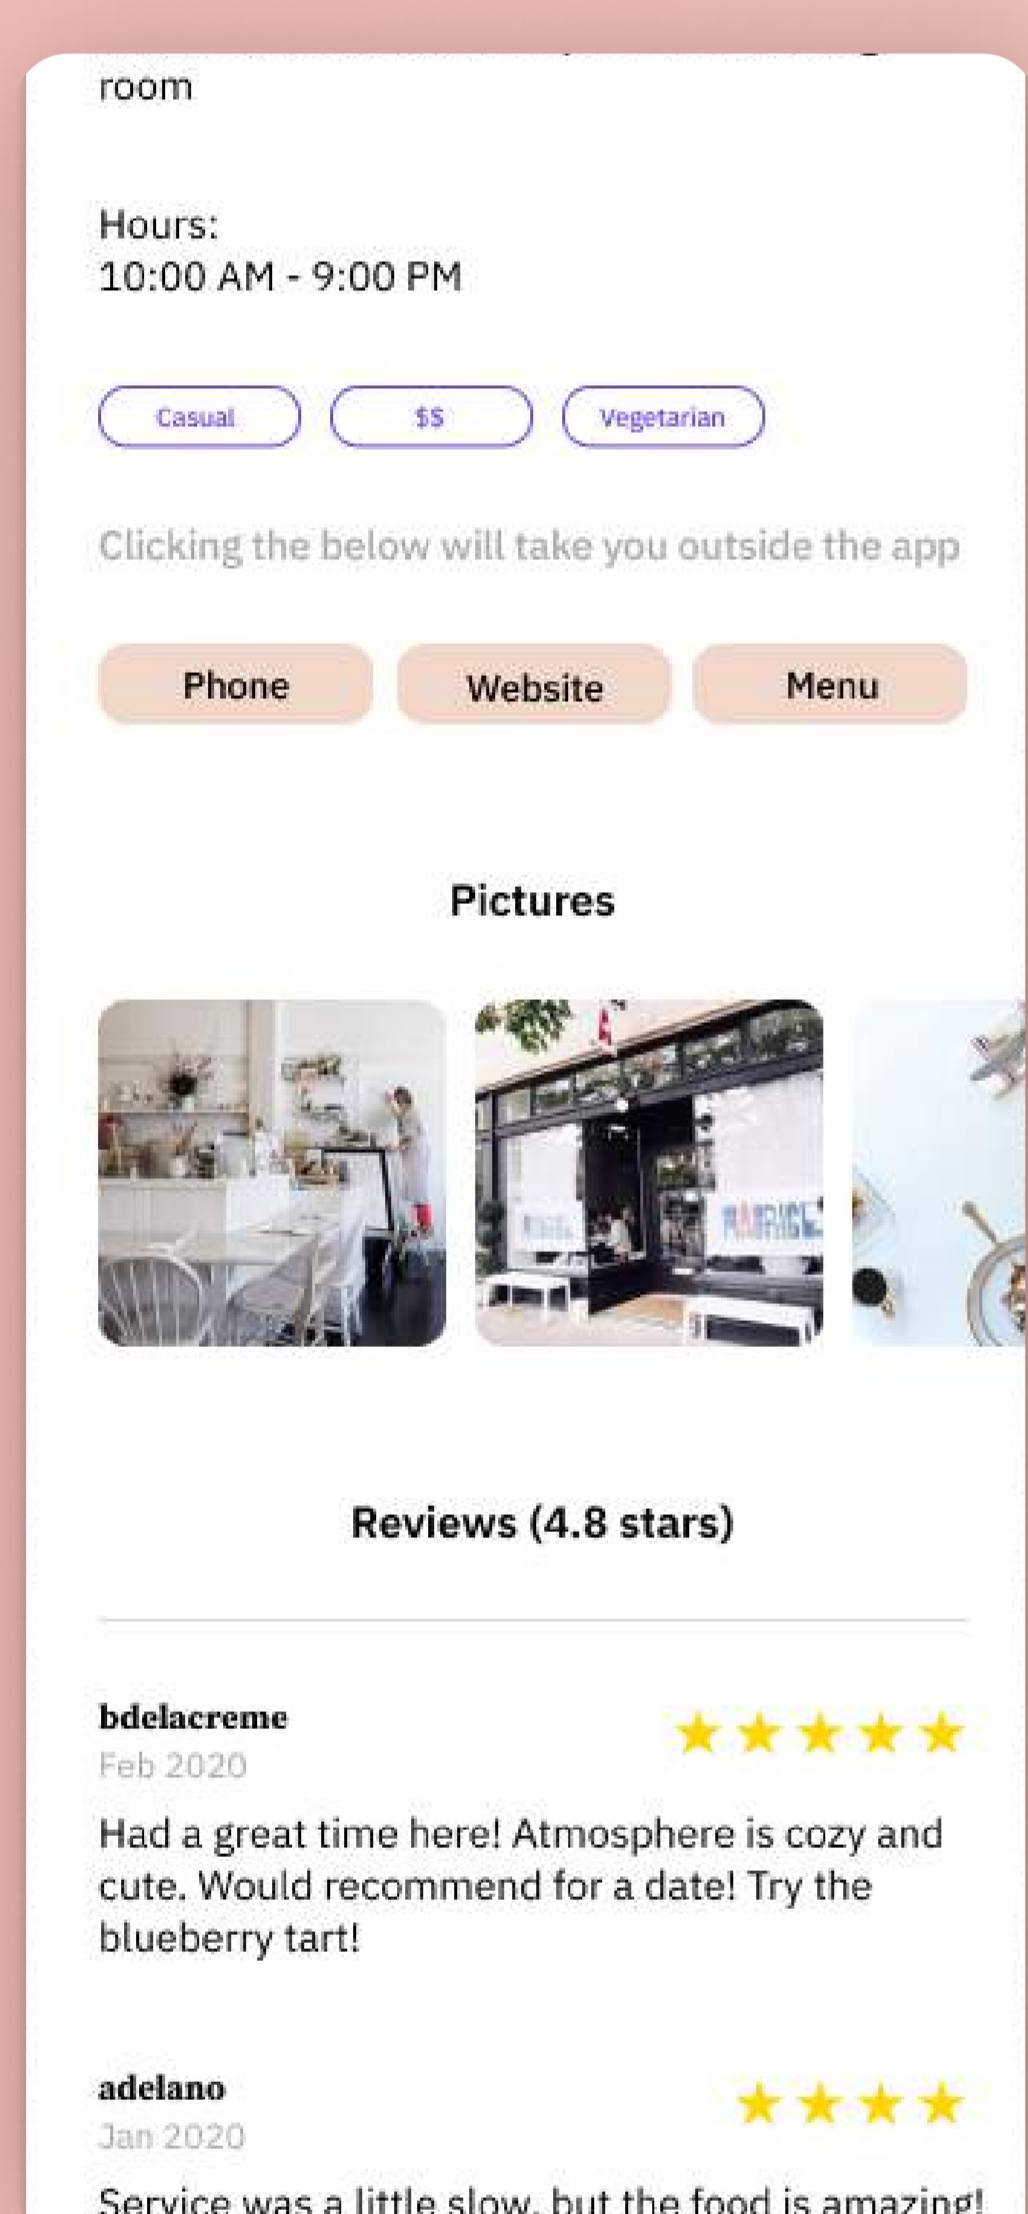

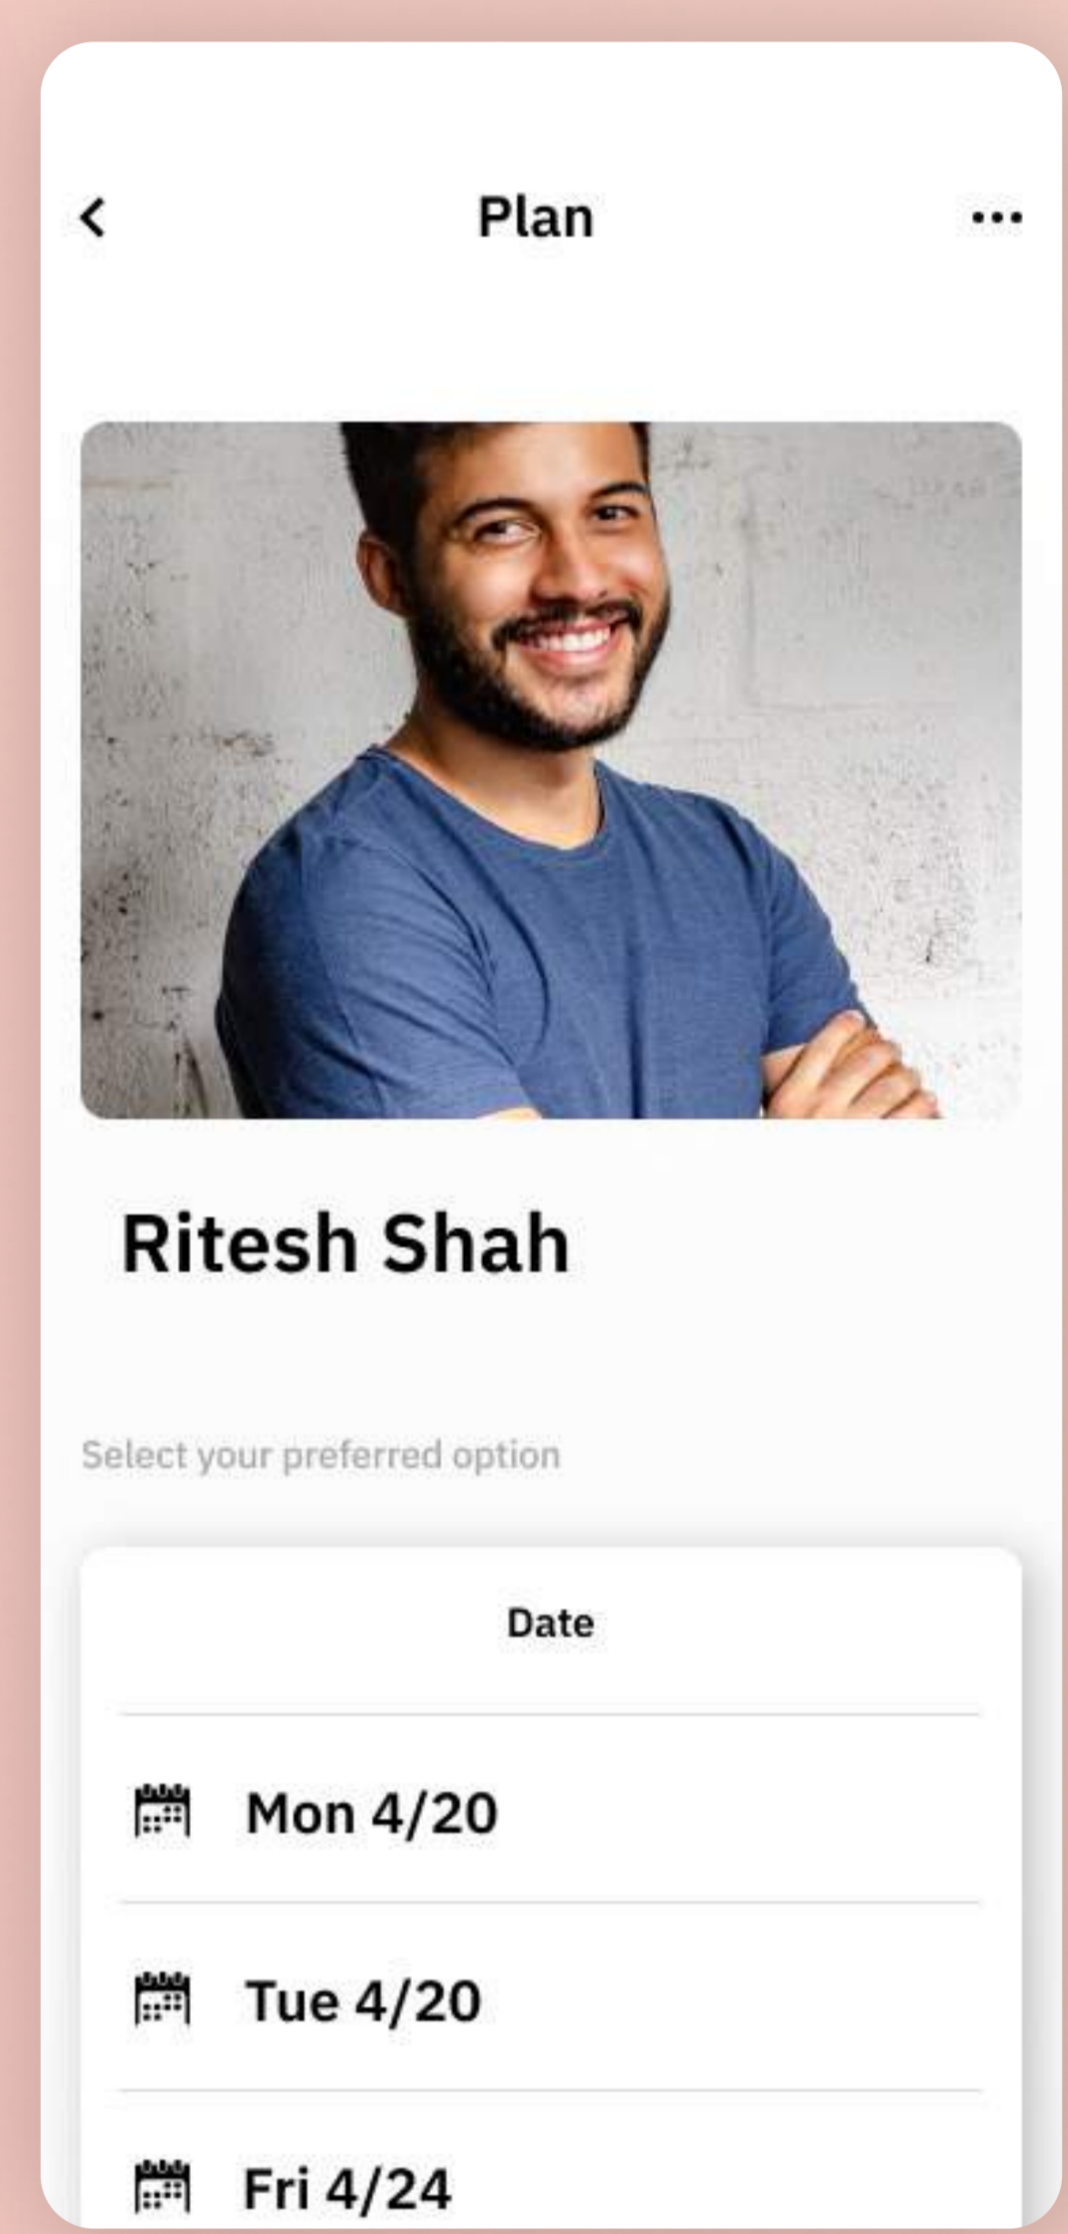

03)

Add favorites button to the location summaries

04)

Have 'Accept' and 'Reject' buttons at the top of the page on the date plan pages

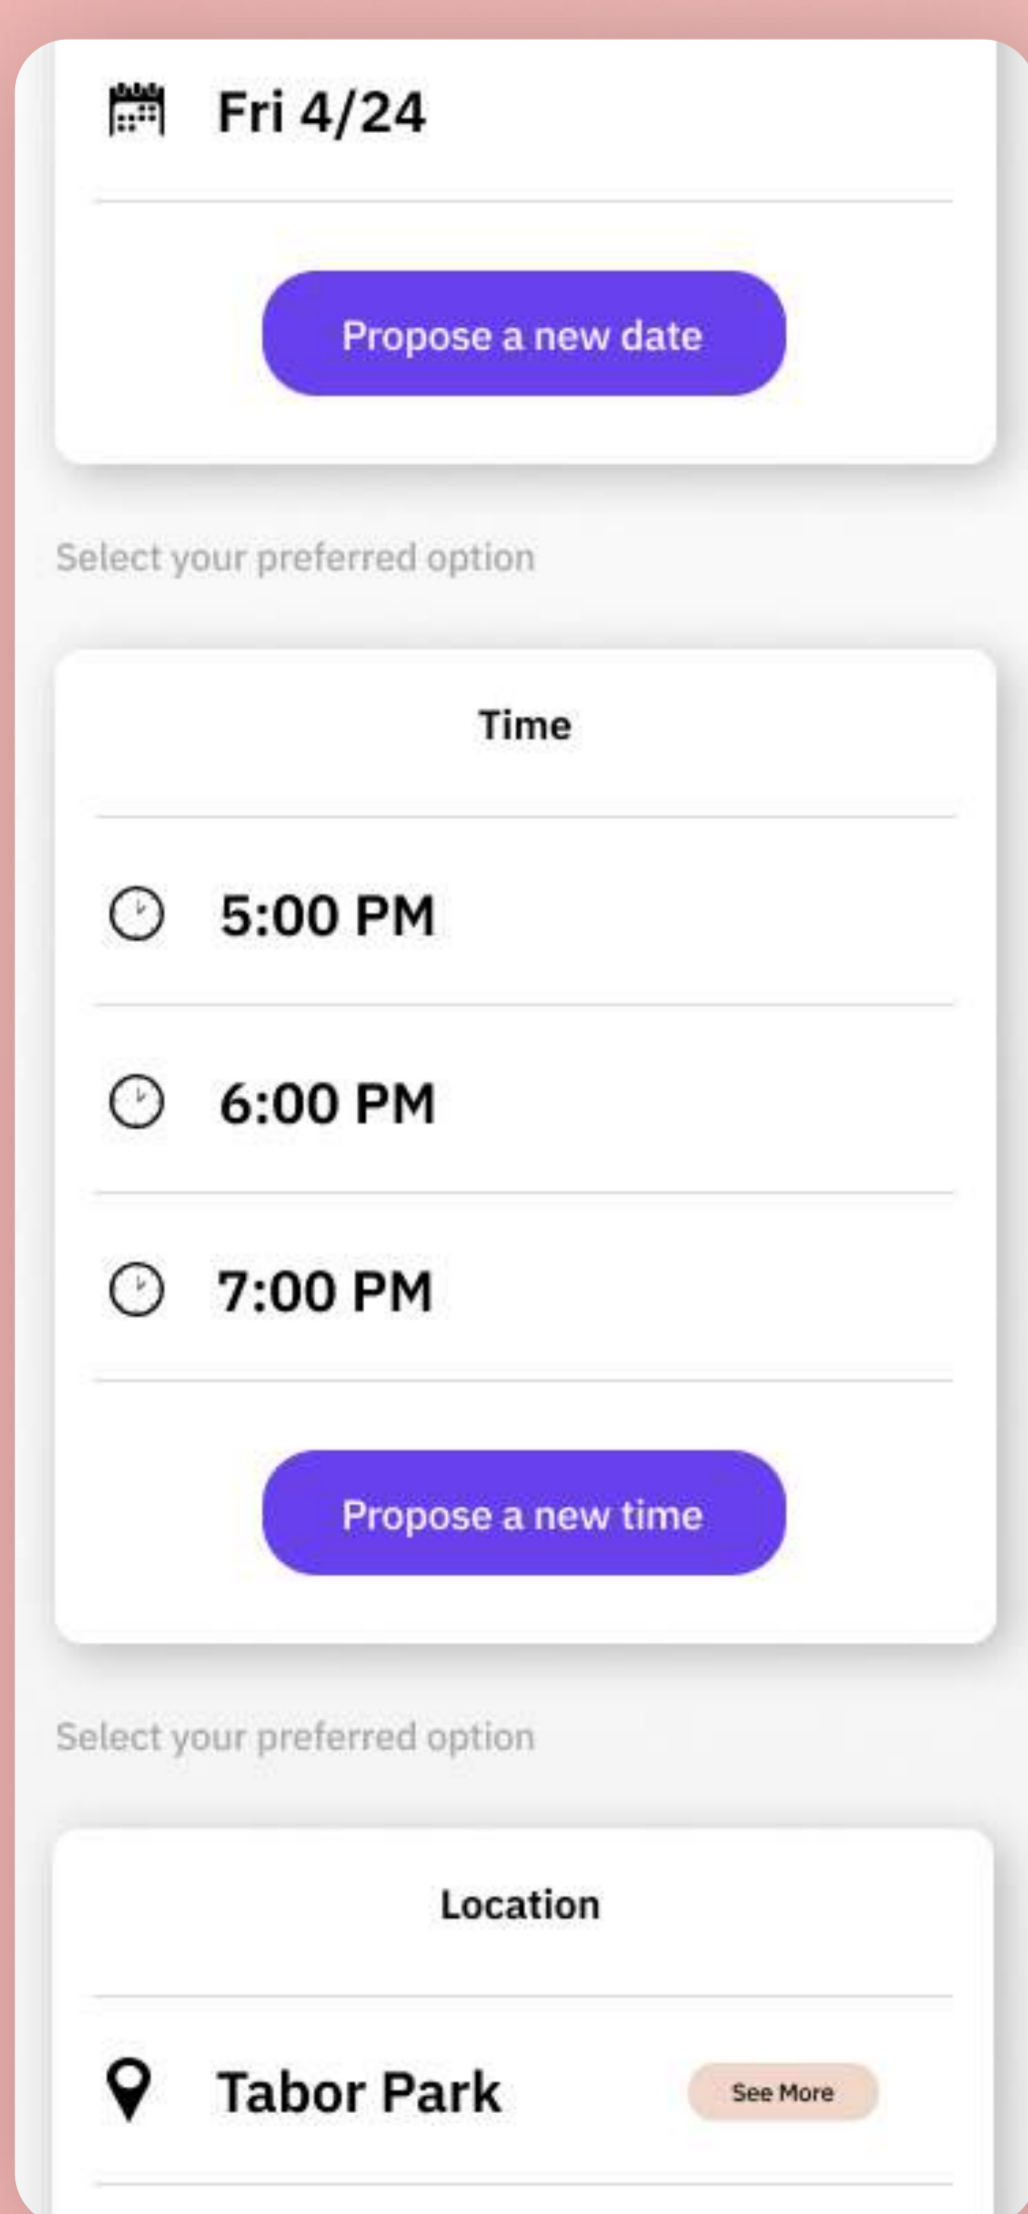

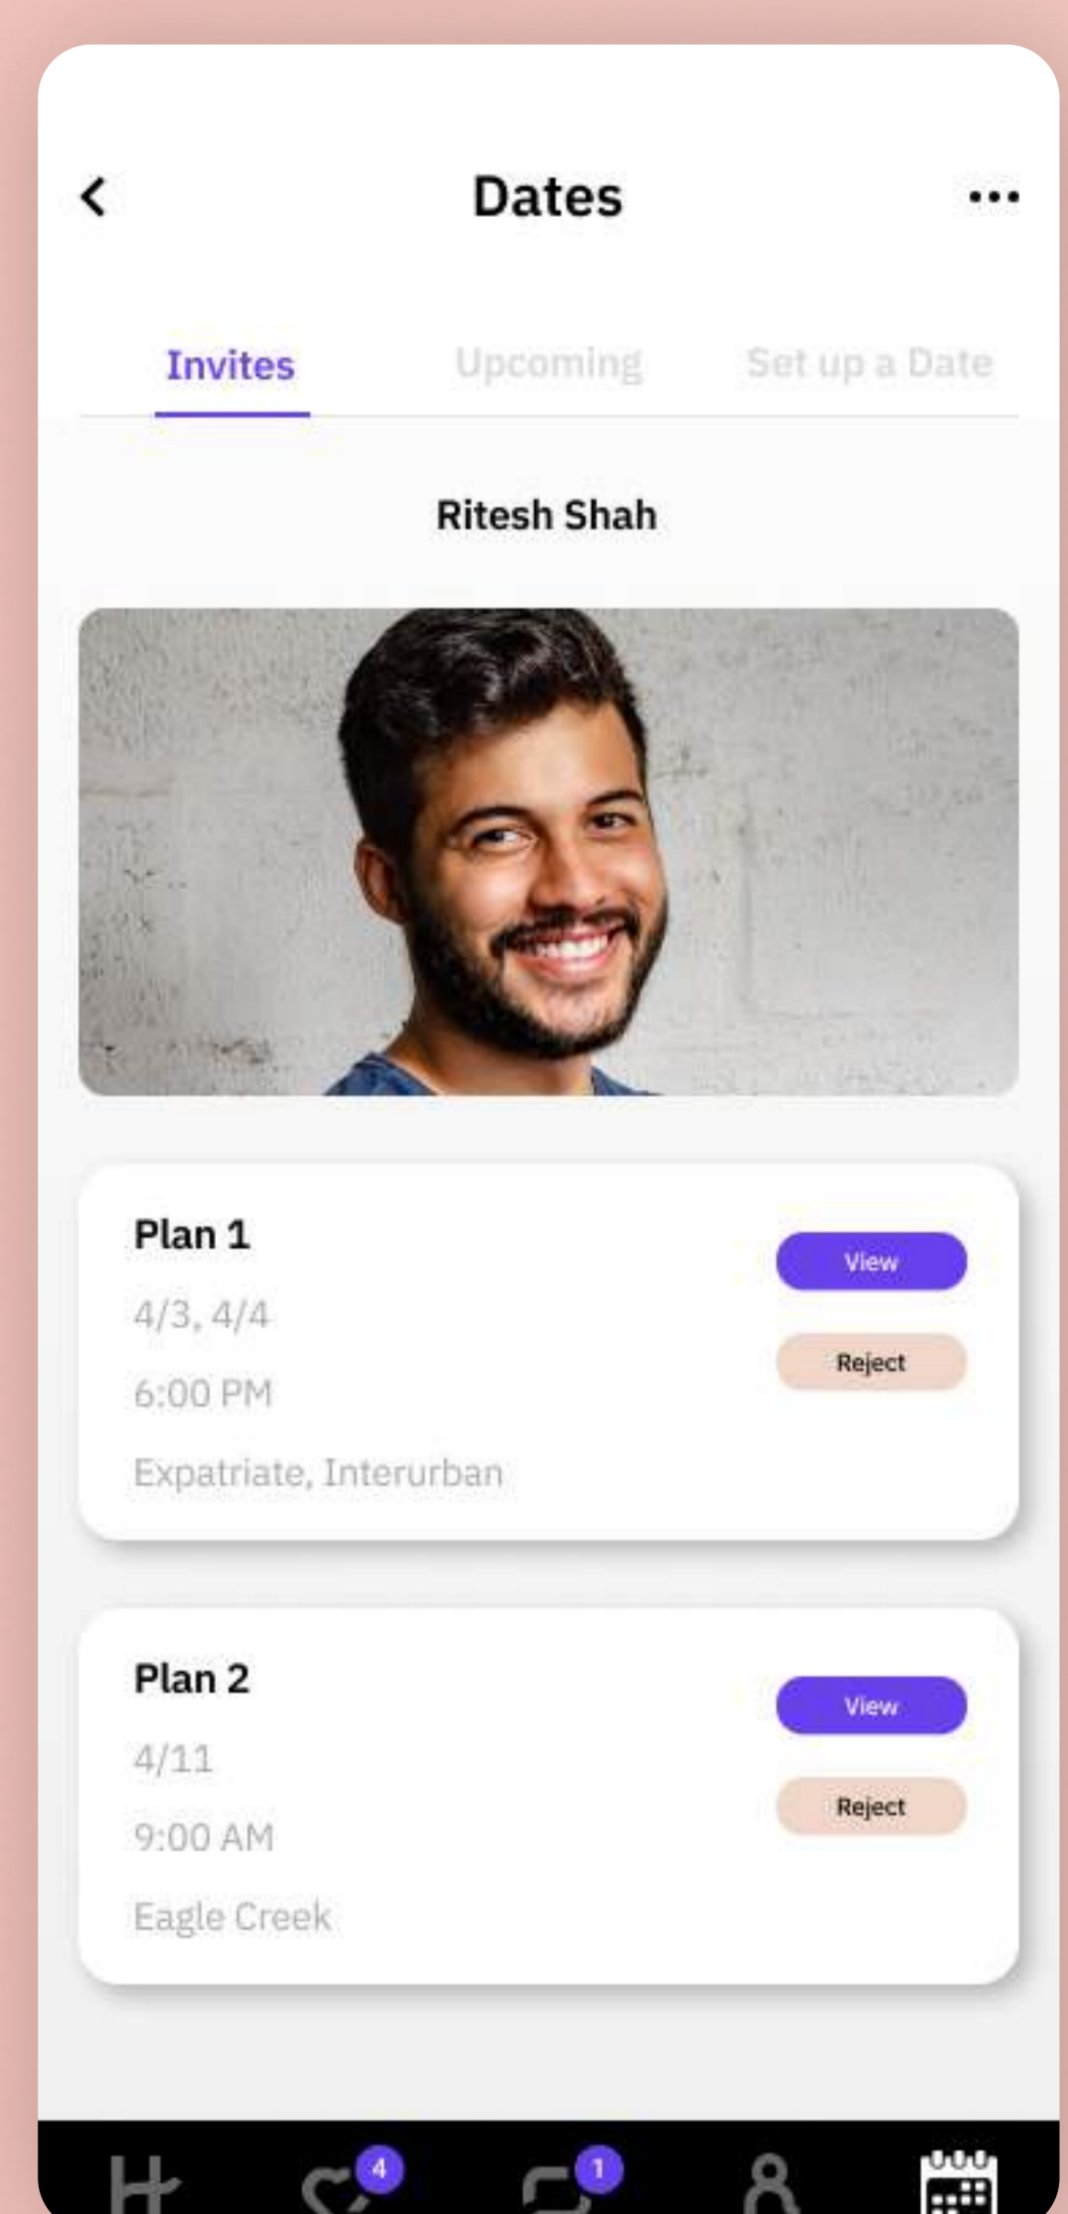

05)

Move the pictures above the location overview on the location pop out page.

06)

Make sure that the multiple options screen has a quick explanation and that it is clear these are options to pick from.

07)

Change the "propose a new...." button on date plans to be a secondary CTA and keep it the same between screens

08)

Make sure that the update button when editing content is higher on the screen and closer to the content that you are editing.
