* Price does not include installation. Some technology may require a certified electrician for safe installation.

Flexible Listening

Listen to different audio sources at the same time at different volume levels throughout your home. Or set all zones to the same source and/or volume.

Better Sound

The multi room audio system also enables you to enjoy good sound from your TVs. The system ensures all sound comes through the in-ceiling speakers including when you are using the built in TV tuner or smart TV features.

Audio Distribution

The Smartlife hub and software is configured to control 4 or 8 rooms of multi-room audio.

You can listen to different sources at the same time at different volume levels throughout your home. Or you can set all the zones to the same source and/or volume to enjoy your music all around your home.

Audio 4x4 can drive up to 4 sources and 4 pair of speakers (requires speakers).

Audio 8x8 can drive up to 8 sources and 8 pair of speakers (requires speakers).

Installation*

The **Multi-room Audio** package is designed to easily install in an existing home or new build. Wireless components and online configuration tools deliver a customised smart home solution controlled from a single app.

Upgrade Options

Now you have a Smartlife hub in your home you can add more smart technology and control it all with the same Smartlife App.
