**Manchester Tank**, an affiliate of McWane, Inc. is a privately held leading manufacturer of low pressure vessels for propane, air, refrigerant, and industrial applications in North America and Australia. We continue to set the standard for quality and reliability, and provide unsurpassed value in both mass-market and customized D.O.T. and A.S.M.E. products.

Manchester Tank has grown from seven employees and one product line in 1946 to an international company of over 1,000 employees and a broad range of products. North American operations include four manufacturing facilities and distribution points throughout the continent, providing timely delivery to local customers. A national sales force works constantly with our customers to ensure we meet their needs efficiently and cost effective. Australian operations include one manufacturing plant and a dedicated sales force, serving markets in Australia, New Zealand and the Pacific Rim. Our corporate service center is located in Franklin, TN.

Manchester Tank's product line is broad and includes virtually all low-pressure tank families. Propane tanks made to DOT specifications range in size from 5 to 420 pounds. We are centered around the LP Gas, recreational vehicle and gas grill industries. Air receivers are built in accordance with ASME requirements and range from 1 to 5,000 gallons with focus on the air compressor, and HVAC markets. Chemical and fire suppressant tanks are built across a wide range of sizes, and custom sized vessel construction is available.

**WHY YOU SHOULD USE MANCHESTER TANKS**

Manchester Tank is the premier manufacturer of pressure vessels. Founded in 1946, Manchester Tank produces quality pressure vessels in North America and Australia.

Manchester Tank's most popular product lines include:

- DOT Propane Cylinders, ranging in size from 5-420 lbs., with a variety of domestic, recreational, commercial and industrial applications
- ASME Propane Tanks, used in Recreational Vehicles to fuel appliances, and as fuel tanks for propane engines in trucks and automobiles
- Refrigerant Cylinders for recovery, reclaiming and storage of refrigerants
- Fire Suppressant Cylinders for dry chemical extinguishers and Halon replacement agents
- Chemical Cylinders for safe storage and transportation
- Air Receivers, ranging in size from very small tanks for portable air compressors up to 30,000 water capacity
- Hand-held torches, ranging in sizes from 500,000 to 2,000,000 BTUs
- HVAC separator, expansion and bladder tanks
- Engineered custom tanks

Manchester Tank's commitment is to remain a market leader in small pressure vessel manufacturing by dedicating itself to fulfilling its customers' needs, which in turn will benefit company sales, growth, profits and employees.
