## **Moonshot Missions Welcomes David St. Pierre**

*Former Chicago CEO Joins Hawkins and Kricun  
nearly 100 years of combined experience in advancing water utilities*

Washington, D.C. – Today, Moonshot Missions welcomes David St. Pierre to their team, the former CEO of the Metropolitan Water Reclamation District of Greater Chicago, and a past water executive in Atlanta and St. Louis. Most recently, St. Pierre works with Westin Technology Solutions, an innovative water system design company.

St. Pierre brings over thirty years' experience in identifying and implementing innovative water processes. Through his leadership he significantly reduced costs at each of the three utilities he served while driving remarkable improvements in performance.

St. Pierre's main role will be to work with water utilities to quickly diagnose and identify projects that can improve services and reduce operating costs. St. Pierre specializes in resource recovery and optimization of treatment systems.

"David will be a key member of the Moonshot Missions' team, and we are thrilled to have him join the organization. Just among the three of us, including Andy Kricun and me, we have nearly 100 years of public utility and government experience," said George Hawkins, Moonshot Missions' Founder and President.

"Moonshot Missions is a great fit for the next chapter of my career," St. Pierre says, "It is not by accident that Moonshot reached out to me at a time that I have been looking for that next step. I am once again honored to work with such wonderful people. I look forward to working with an organization founded on the principles of service and giving back."

Moonshot Missions launched in April this year and works to drive down the costs of water utility operations using field tested practices while increasing the performance outcomes – all of which helps with affordability and public health. A utility can experience its own Moonshot when it embraces a path to sustainable performance and affordability.

"In this day of the COVID-19 pandemic, smaller, rural and tribal utilities are struggling more than ever," said Hawkins. "It is imperative we identify significant cost reductions, introduce new technologies and strive for efficiency to relieve the burden on the utility as well as the rate payer. David will be a big part of making that happen as part of the Moonshot Missions team."

**About Moonshot Missions:** *Moonshot Missions is a 501(c)(3) non-profit dedicated to finding solutions to provide safe and clean water to all communities no matter their location.
