

MOONSHOT MISSIONS

WHY JOIN US?

If you are passionate about water issues and environmental equity, please consider joining our Moonshot Missions team! Moonshot Missions is led by George Hawkins, a visionary leader in the water sector and well known for transforming DC Water into an innovative, customer-driven enterprise. We are a small but rapidly growing non-profit start-up, working directly to improve drinking water quality and wastewater services, as well as affordability and resiliency for underserved communities. Whether you are just launching your career or looking to broaden your experience in the water industry, becoming part of the Moonshot Missions team will enable you to work alongside veteran water leaders, make a direct impact on our sector, while helping to ensure safe and clean water is delivered to the people who need it most!

POSITION DESCRIPTION

Moonshot Missions seeks an Engineering Research Associate Volunteer to serve as a technical resource to the organization, reporting to the Senior Director and supporting the Research Team. The associate will apply research and knowledge to address the challenges facing drinking water and wastewater utilities, particularly in economically distressed communities. Moonshot Missions is currently working on topics related to environmental equity, such as drinking water and wastewater operational optimization and affordability, providing access to clean water in communities across the U.S. Our work aims to level the playing field in the water sector so every American has access to clean and affordable drinking water and sanitation services.
