Marcin Walendowski
Senior Software Engineer

HIRE ME

About me

A top-notch Senior Software Engineer with 7+ years of programming experience in JS. Over 8+ years I shipped over 100+ websites, web/mobile/desktop apps and backend services. I specialise in: Node.js, React, React Native, Electron, and Meteor but love JavaScript & Node.js the most. Personally, a homegrown pizzaiolo.

Testimonials

Ferran Negre Pizarro
Senior React Native Developer at Flip Fit

2020

Worked together

"Marcin is a really hard working developer. But not only that, he also spends time to build relations with people and to help management in order to grow the business. He knows how to deal with React, React Native and all the ecosystem around those. Teams simply like Marcin. His vibe and skills make him a really good professional."

Bartłomiej Pierzchała
Product Designer at Netguru

2020

Worked together

"Marcin is an excellent team player. He's highly skilled in digital product development, excelling at React Native. His social skills make him a great colleague and you'd wish to have him on your team. As a lead product designer, I worked closely with him on facilitating our design hand-off process and setting up our design system. Cross-functional communication skills are strong with this one!"

Adam Golqb
Fullstack JavaScript Developer at Brainhub.eu

2020

Worked together

"When discussing a new functionality his voice was always present, often recommending alternate ways on how to work on a task if something does not go well. He is a great observer, suggests great solutions for these issues that can be easily adapted by the team. His hard skills together with communication skills and helpfulness make him a great team member for any project. I highly believe that Marcin would be a valuable member and an asset to every team."
