

Arctica Titanium Aquarium Chillers

Arctica Titanium Series Aquarium Chiller is a state-of-the-art aquarium cooler that incorporates the most advanced technological features compared to any other chiller on the market. Many years of research and development has allowed us to offer the perfect solution to stabilize water temperatures for your aquarium environment. These units have been designed for maximum temperature pull down (BTU's) with the least amount of energy draw. This series ranges from 1/10HP – 1/3HP.

Model	HP	Capacity (Btu/hr)	Volts	Amps	Flow Rate in GPM (Min./Max.)	Dimensions (inch)	Weight (LBS)	Tank Size without Equipment (Gallons)	Water Connections
DBA-075	1/10	1,270	115	2.63	4/16	9.8 ^w × 16.5 ^d × 18.5 ^h	44	Up to 130	1/2", 5/8", 3/4"
DBA-150	1/5	2,400	115	5.0	8/22	9.8 ^w × 16.5 ^d × 20.9 ^h	49	180	1/2", 5/8", 3/4"
DBE-200	1/4	3,000	115	6.0	8/32	9.8 ^w × 16.5 ^d × 20.9 ^h	51	260	1/2", 5/8", 3/4"
DBM-250	1/3	4,000	115	7.25	8/40	13.7 ^w × 15.7 ^d × 17.7 ^h	61	340	1/2", 5/8", 3/4"

Specifications are subject to change without notice.

We recommend choosing the next size chiller to achieve optimal performance & efficiency on aquariums with excessive heat sources.
