Logos Created

These are some of the logos I've created for different organizations. Most of them are made to Upwork organizations.

Logo for JXT

This organization wanted to create a logo that combines several letters (JXT) in a creative manner, into one simple logo that combines all letters.

What I did firstly was to create several versions of J, X and T, and understand the different modalities. In the end the client got about 20 different logos.

Final logos for JXT

Rabobank

Coöperatieve Rabobank U.A. is a full-range financial services provider that operates on cooperative principles. Its origins lie in the local loan cooperatives that were founded in the Netherlands nearly 110 years ago by enterprising people who had virtually no access to the capital market.

This organization wanted to create a section of their company that is specialized in Artificial Intelligence and Data science, and therefore, they asked Ilumy and my collaboration to suggest

Rabobank, a Dutch multinational banking and financial services company, wanted to ensure they had the best possible sales process to stay competitive in a crowded market.

several icons, several logos, several visual identity ideas that resonate with their brain and introduce the topic for internal discussion and generate better understanding of the topic.

The logo of Rabobank. (above)

Symbols and future logos that I created for Rabobank

Care4Corona

This organization wanted to provide more information about Corona to the Dutch citizens, and so they suggested me to create a new visual identity and also a new logo. Which I created and they are using in their website, and also we have created their webpage.

The logo design, and the webdesign page

Welkom

I've been doing my thesis in this organization, and so they asked my collaboration to work on this project that consists into a more realistic skype call which can reunite many people, by simply generating a call password. Well, I needed to do the brand design and also logo design, working with my colleague.

The logos I've explored for Welkom, and the website style
