

Empower your members with SanoCare

74% of consumers are highly satisfied with telehealth.

But, too many people are left behind...

The Challenge...

As virtual care and digital health intervention become increasingly preferred modes of healthcare delivery, many of your members are left behind due to barriers such as inadequate digital equipment, unreliable connectivity or low digital literacy. More than 30% of your members are impacted, resulting in:

- Ineffective clinical care management
- Low member engagement and loyalty
- Reduced risk adjustment
- Unsatisfactory CAHPS scores and Star ratings

Even for those who are digitally equipped, fragmented resources, complicated solutions and limited connectivity hamper participation.

As virtual care delivery expands, engagement will only worsen without solutions that mitigate the impediments

The Solution...

SanoCare Virtual Care Hub

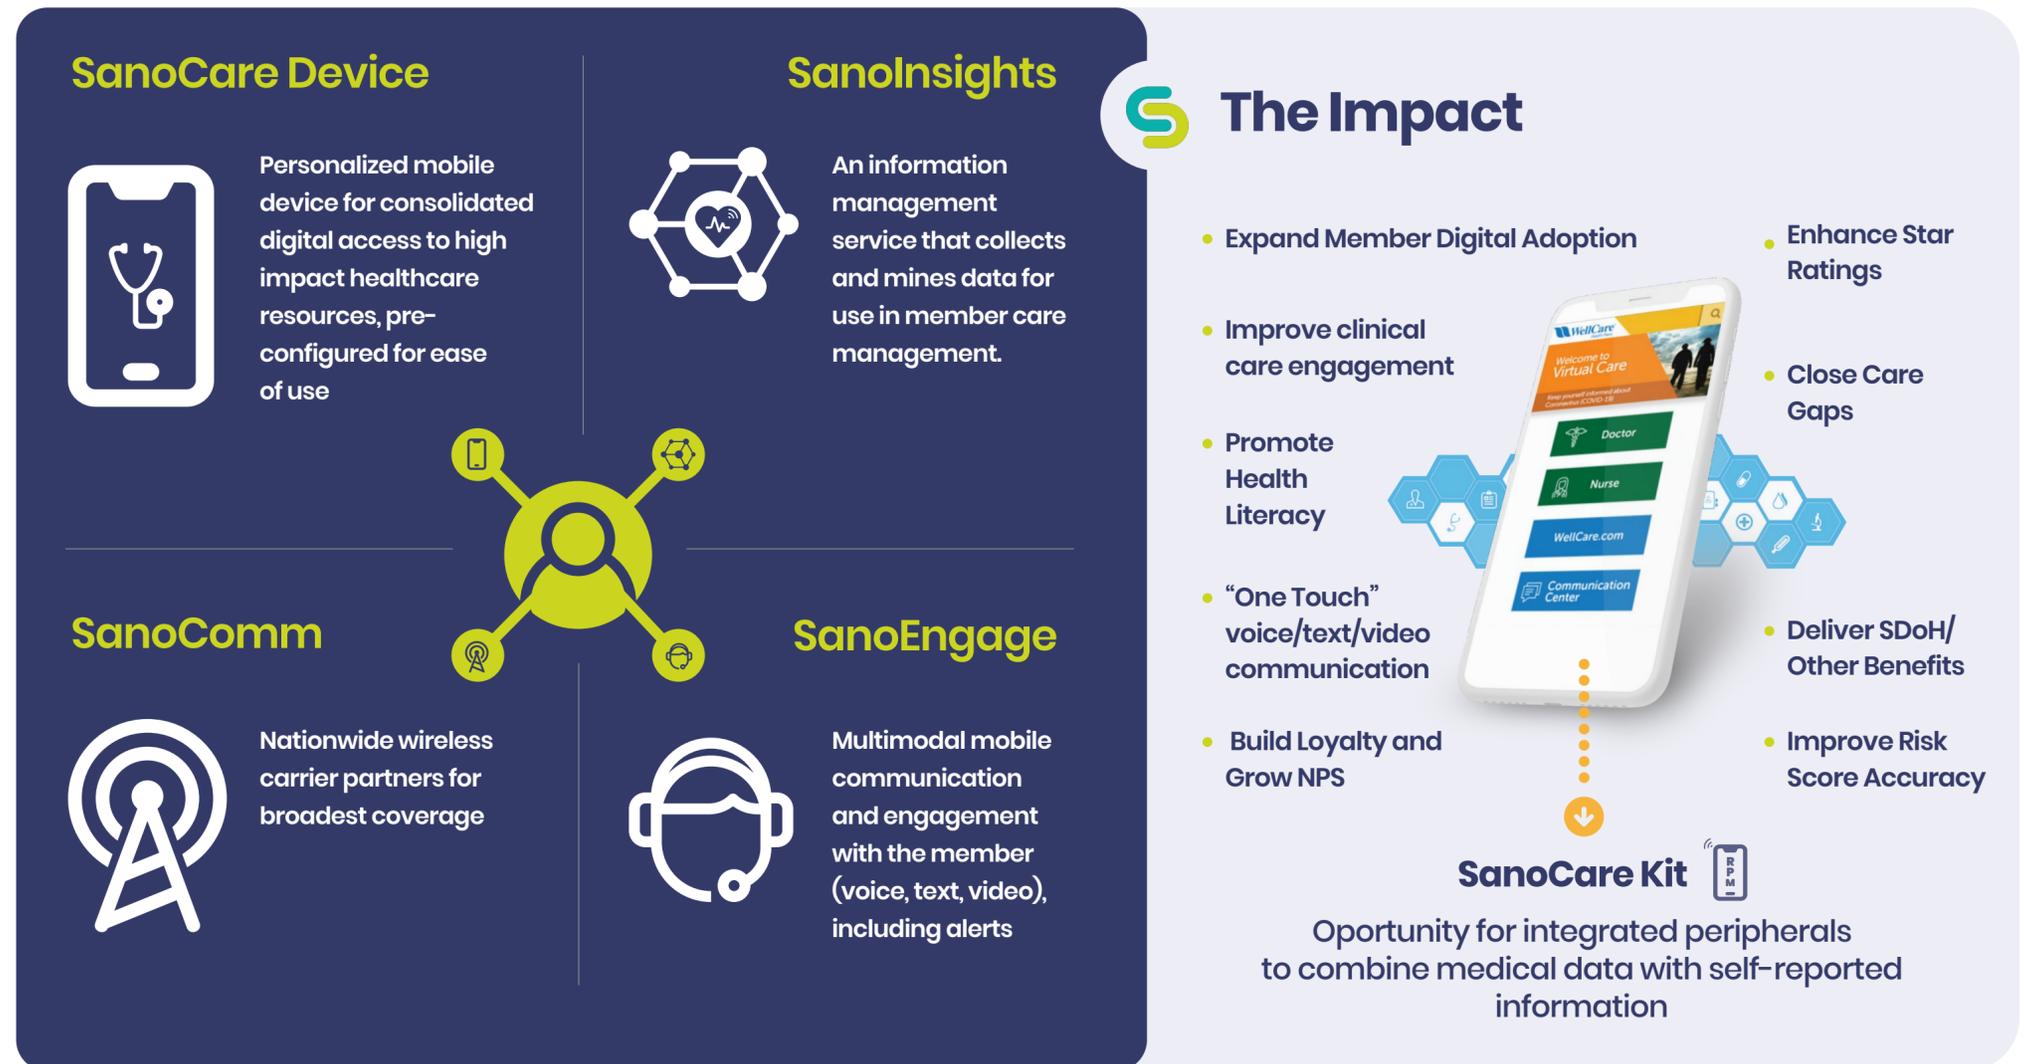

SanoCare, a *supplemental benefit*, provides a carefully configured, personalized digital “front door” for members to access their healthcare benefits.

It simplifies digital healthcare access, enabling easy access to all critical healthcare resources, leading to increased engagement and better health for your members.

SanoCare provides health plans with enhanced information, virtual assessment, monitoring, communications, and care management capabilities.
