

Improve remote patient monitoring with EBB-funded SanoCare.

Customized patient mobile device optimized for healthcare

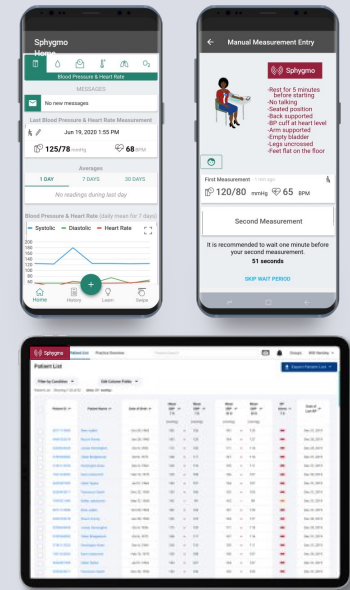

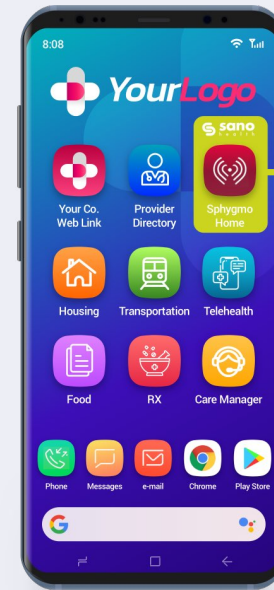

The patient's mobile device is NOT an adequate companion to RPM

- Incompatible operating system or limited memory
- Insufficient broadband
- Patients often find it confusing to download and configure RPM apps and to pair with RPM devices

This is a burden for overstretched care managers

SanoCare / Sphygmo – A Comprehensive RPM Solution

- Sphygmo is an RPM software platform that supports guideline concordant, patient directed VS remote monitoring. It consists of a patient app, and a portal for review by care provider.
- SanoCare is a customized patient mobile device for communication, engagement, education, telehealth, and monitoring.
It is pre-configured with the Sphygmo app and pre-connected to the monitoring devices.

SanoCare removes the impediments associated with using the patient's personal device.

Fund SanoCare with EBB subsidy

Sano Health is an approved Emergency Broadband Benefit (EBB) service provider. EBB subsidy fully covers the cost of the SanoCare for eligible patients, at no cost to patients or Federally Qualified Health Centers.

Sphygmo Supported RPM Bluetooth Devices

Blood Pressure Monitors

A&D Medical

- A&D Medical Premium Wireless Blood Pressure Monitor UA-651BLE
- A&D Medical Premium Wireless Blood Pressure Monitor UA-1200BLE
