HTML/CSS

## Tools

Sketch  
Figma  
Adobe XD  
Principle  
InVision  
Marvelapp  
After Effects  
Premiere Pro  
Webflow

## Work Experience

### Nutanix — UX Design Intern

San Jose, California, USA | May 2020 - July 2020

Took ownership and designed "Entity Browser 2.0" (Deals with managing entities like VM's, Clusters, etc.) for Nutanix "Prism Central" application, which led this project to be incorporated into the 2020 Q4 roadmap.

Led project meetings with cross-functional teams and drove convergence to ship designs for a 15,000+ global customer base.

Evaluated design concepts and decisions by conducting usability testing with four users and driving heuristic evaluation sessions with the product design team.

### Red Hat — Product Designer

Bangalore, India | March 2018 - June 2019

Led and launched multiple projects of OpenShift and OpenShift.io, which had 10,000+ daily active users.

Created and refined UI components for the Red Hat design system and redesigned Red Hat products to maintain consistency and UI standards.

Published a research case study on collaboration methods between designers and developers in the enterprise work environment.

### Red Hat — UX Design Intern

Bangalore, India | September 2017 - March 2018

Led and launched the "Stack Report" (Deals with analyzing application stack) for the product OpenShift.io, which had 1,000+ daily active users.

Conducted study on the standardization of UI patterns, which led to making all Red Hat product's UI behavior consistent.

Learned how to collaborate effectively with cross-functional teams in the agile work environment, which helped me produce better results in in-person and in a remote work environment.

## Other Key Experience

### Indiana University — UX Research and Teaching Assistant

Indianapolis, USA | August 2019 - Present

Doing a teaching assistantship with Prof. Sonny Kirkley by helping him in teaching and grading five HCI/design-based courses for master's and bachelor's students.

Did a research assistantship with Prof. Erin Brady for an assistive technology project developed for people with disabilities in a workspace environment.
