

IFS Notification

Marel / Delford 8000 Weigh Price Labeler (WPL)

Alle variants of the 8000-series

End of Full Service (EoFS)
Marel/Delford End Of Life (EoL)

End of Full Service Date	1 August 2018
End of Life Date	1 August 2019

We (Marel EOL / IFS Nederland) hereby inform the users of the above systems of the following support decision.

The End of Full Service (EoFS) date is the 1st of August 2018

After that time, the product can only be supported based on best effort, for example, the availability of spare parts is reduced or limited, retrofit or upgrade kits are not available anymore, support is only available during business hours and longer response times.

Software maintenance, including new functionality or improvements, is limited to the best of efforts.

The End of Life (EoL) date is the 1st of August 2019

After this time, there may be none or limited support for this product.

This notice also applies to existing or proposed service contracts.

After EoFS, end users are strongly advised to replace their equipment and / or order sufficient spare parts to support keeping their machines operational for the desired period.

This notice also applies to Label printers and other equipment provided as part of the 8000 WPL solution.

Parts of supplied 8000 systems may be excluded from this notice. Please contact us for further information and guidance.

We advise you to revise your stock of spare parts in line with this EoFS notification.

It goes without saying that I (Peter Boom, director IFS Nederland B.V.) will personally make an appointment to discuss the options with you.

Please contact Mr. Teus Meewis, our Service Manager, with questions and / or comments, or with regard to support during the EoFS phase.

We hope to have informed you sufficiently.

Kind Regards,
IFS Nederland B.V.

Peter Boom
