

VIZZ FOR CONSTRUCTION

ViZZ enhances any construction project, providing the ability to visualize, manage and coordinate data about any building or project from any source, with any stakeholder.

VISUALIZATION IS VALUABLE

Visualization

Examine the model, discovering potential problems before the build, while tracking daily reports, timelines, safety logs and other important aspects of your project.

Integration

Quickly and easily import and merge information, models and details from more places and software programs than ever.

Collaboration

Create and track notes, emails, and RFIs between all stakeholders including Owners, Architects, Designers, Engineers, Contractors and Subcontractors.

WHY VIZZ?

Improve Client Satisfaction

Informed Decisions

Saves You Time and Money
