Endorsement: Cosmetic product line “Amilera”

by

Dr. Peter Engels

Hereby, I declare that Amilera is an outstanding cosmetic product line with regards to its anti-aging properties. From my scientific perspective, the used hyaluronic acid molecular weight range represents the optimal spectrum of molecules to obtain the full anti-aging functionality like skin hydration, skin elasticity and wrinkle depth reduction. As preclinical observations are backed by clinical studies, I can highly endorse the product as anti-aging product.
