Peter Engels grew up in Cologne/Germany. He received his undergraduate degree in Zoology from Cologne University. His diploma thesis in Molecular Biology as well as his Ph.D. thesis in Plant Molecular Biology was performed at the Cologne Max Planck Institute for plant breeding.

Peter has more than 25 years of scientific experience in biology, molecular biology and biochemistry. Peter has industrial management experience from his years at Sandoz/Novartis and biotech where he directed numerous molecular biology projects in anti-inflammatory diseases, CNS and genomics. Furthermore, he has more than 20 years' experience in the field of preclinical and early clinical project management, IP management, and business development from his responsibilities taken at pharma, biotech and consultant activities.

2004/2005 he started a consultant business, making use of his knowledge, experience, scientific understanding and network to third parties in the field. In parallel he co-founded two small companies (Galantos Genetics GmbH & Anolis Pharma GmbH), active in the field of DNA testing and dermatology/cosmetics. At Anolis Pharma he developed two own cosmetic lines (Beobab® and Bio®Derm) for cosmetic professionals.

Since 2010, his main focus is in scientific and clinical projects related to the area of wound care. 2012 he obtained the ICW e.V. "Wound mentor/expert" certificate and is member of the ICW e.V..

Peter has published several peer-reviewed research papers in various scientific journals mainly in the field of molecular biology and wound care. In addition he filed several patent applications.
