

Global Enterprise Portal Miba AG

Miba is an internationale group of companies headquartered in Laarkirchen, Upper Austria, which develops and produces technologically sophisticated and highly stressable drive components. Miba plain bearings, sintered components, friction linings, power electronics components and coatings make vehicles and power plants more powerful, efficient and environmentally friendly.

”

„The cooperation was super pragmatic: everything transparent and well documented when it became tight, with handshake quality, fast and solution-oriented.“

Thomas Meixner
Manager Strategic Projects

“

Requirements

As a leading and and strategic partner of the international and automotive industry and as an international technology group, Miba AG demands the highest standards of quality and the degree of innovation of their products and technologies. Profitable growth and being the Global Number 1 in their relevant market segment are clearly defined goals of the company. Their Motto „Dynamic Evolution“ which accompanies the family business on its way to 2020 and is based on the

three supporting pillars of global growth, innovation and technology as well as on people, requires a change of culture & collaboration additionally. With the introduction of a Corporate Enterprise Portals, Miba AG wanted to support the process of the digitisation strategy through more transparent, more target-group-specific, paperless distribution of information and accelerated communication as well as the cultural change of the company.

Solution

After an intensive strategy and conception phase, in which the needs and requirements of Miba AG were defined with regard to the first implementation phase of its future corporate strategy, the next step was the definition of the individual and visual design. The global company portal based on Microsoft SharePoint

has also been adopted to the needs of an internationally active company due to the worldwide distributed locations, multilingual and individually. Especially through the use of Publishing Add-Ins, the communication and distribution of information should be accelerated and simplified significantly.

Result

The adaptation to the corporate design made the company portal „Sun“ to an visually appealing virtual home for employees of all locations around the world. A project carried out by an external agency lasting several weeks with changing slogans, accompanied the employees until the go-live of the new portal and thus ensured a fast and active use of the portal. The introduction of several Publishing Add-Ins such as the News App, Events App, Canteen App and Bulletin Board, provide a high level of interaction across all locations. By building up the portal on the basis of Add-

In Technology, Miba AG was able to create a stepwise function and advancement as well as a future-proof and investment-safe solution with high usability and upgrade capability.

Feedback after go-live:

„today I was proud to open the portal and surf on it.“
Bernhard Reisner, Vice President Human Capital
