

# DARTMOUTH COLLEGE

C19 Insider Scoop

## RESEARCH PROJECT INFORMATION SHEET

This research project is being led by Prof. Temiloluwa Prioleau from the Computer Science Department at Dartmouth College, Hanover, NH, USA. The aim of this study is to enable the society as a whole learn from the experiences of persons who have recovered from the novel coronavirus (i.e. COVID-19). Currently, little is known about the recovered population, especially those who were not hospitalized during the course of their illness. This population can provide insights to guide future recommendations, policies, and even treatment plans on COVID-19. See the project website for details: [www.c19insider.com](http://www.c19insider.com).

Your participation is voluntary. Participation involves one-time completion of an anonymous online survey (estimated time: 20 – 30-minutes). You may choose to not answer any or all questions.

The information collected will be maintained confidentially and anonymously. Names and other identifying information will not be collected or used in any presentation or paper written about this project. With your permission, your alias name (i.e. an anonymous name) can be used to publicly recognize your support and contribution to this work.
