

**PreOmics and Bruker announced a co-development and co-marketing agreement, which will focus on PreOmics iST sample preparation technology on the Bruker timsTOF Pro.**

Atlanta, June 4, 2019 – At the 67th American Society for Mass Spectrometry Conference (ASMS), being held June 2-6 in Atlanta, PreOmics and Bruker are announcing their co-development and co-marketing agreement for innovative protein sample preparation and mass spectrometry workflows.

The PreOmics inStageTip (iST) technology removes detergents, polymers, salts, lipids and other contaminants, and has exceptional peptide recovery. New iST protocols enable robust and reproducible sample preparation with a significant time advantage (over 40 hrs saved) compared to common protocols, and iST is suitable for integration in semi-automated, high-throughput sample prep.

Drs. Nils Kulak and Garwin Pichler, Managing Directors at PreOmics, commented: "We are very excited to work with Bruker on end-to-end workflows that make protein analysis simply better, and to share these improvements with our highly valued academic and biopharma customers around the world. We are convinced that the power of the timsTOF Pro for 4D proteomics is a perfect match for our iST sample processing technology."

**About PreOmics GmbH**

PreOmics is a spin-off company from the proteomics research group of pioneer Matthias Mann at the Max-Planck Institute of Biochemistry. We at PreOmics develop and provide innovative technologies for mass spectrometry-based proteomics to make your research simply better. Our mission is to provide you with the best possible solutions and at the highest quality to achieve your results faster, easier and in a more robust manner than ever before.
