Score Calculation Information

How were these scores calculated?

We at Savvy Pre-Med are enthusiastic - a little too enthusiastic, you could say - about researching what makes medical schools tick. We have gone website by website, med school by med school, in search of the average GPA's and MCAT scores of their incoming classes. We've compiled the most current data available into this chart.

What are the light blue scores?

Light blue scores indicate scores that were not available for this year, so we've used prior year information to give you a rough estimate.

What are the different types of medical schools?

MD - MD Degree

DO - DO Degree

CA - MD Degree, Canadian Medical Schools
