

DAIRY RANGE

Calfgro Pellets

Calfgro is a nutritionally balanced high energy and protein pellet, designed to be fed to calves from 1 week of age until 10-12 weeks of age.

Features

Benefits

Nutritionally balanced ration	> Meets the demands of growing calves
High energy density ration	> Rapid growth and development
20% protein ration	> Optimum protein level for growth and development of calves less than 12 weeks of age
Quality assured vitamin/trace mineral premix	> Provides the essential vitamins and minerals to meet nutritional demands of growth and to maintain calf health
Aids early rumen development	> Early weaning onto pasture
Contains Bovatec® 150 (lasalocid sodium)	> Improves feed conversion efficiency and aids in the prevention of coccidiosis
Pelleted feed	> Reduces dust and prevents wastage
No ingredient separation	> Even nutrient blend received by each calf
Raw material receival standards	> High quality and safety of ingredients
Least cost formulation	> Better value for your feed dollar

NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	20.0%
Metabolisable Energy (est)	12.5 MJ/kg
Crude Fibre (max)	15.7%
Calcium (min)	0.55%
Phosphorus (min)	0.30%
Lasalocid	135mg/kg

INGREDIENT SELECTION

Lupins, barley, oats, wheat, triticale, cereal byproducts, cereal straw, limesand, dicalcium phosphate, molasses, salt, vitamin/trace mineral premix, lasalocid sodium

FEEDING DIRECTIONS

Calfgro is designed to be fed ad lib to calves between 1 week to 10-12 weeks of age. It should be fed with clean straw prior to weaning. Make sure pellets are always fresh to encourage intake.

Calfgro aids in the development of the rumen to enable earlier utilisation of pasture.
