

KINDERGARTEN CURRICULUM

WHAT MATH SKILL NEEDS MORE PRACTICE?

STUDENTS WILL BE ABLE TO ADD AND SUBTRACT USING THEIR FINGERS, DRAWINGS, OBJECTS, OR MENTAL PICTURES.

WHAT DOES MY CHILD NEED TO DO?

This standard calls for students to be able to answer simple addition and subtraction problems. In order to help them solve the problem, students may use tools to support their thinking including: objects, fingers, mental images, drawings, sounds (like claps), or acting it out.

WHAT IS FLUENCY?

Math fluency with counting to 100 involves accurately counting to 100 without help. Students should be able to do this automatically without skipping numbers or being told what number comes next. Students should be able to count to 100 independently every time it is attempted.
