

# EASY CLEAN

## Concentrated Bio Active Enzyme Floor Cleaner

### Product Properties

COLOR: Clear, Green  
ODOR: Fresh  
pH: 8.5  
SPECIFIC GRAVITY: 1.008  
SOLUBILITY IN WATER: Complete  
DETERGENCY: Excellent

### Description

This new generation foaming cleaner and degreaser is specifically designed for use on quarry tile floors. Utilizing the latest cleaning technology, Easy Clean employs bioactive enzymes to digest oils and food soils without the use of harsh caustic chemicals. Its powerful surfactants and builders help penetrate the pores in quarry tile, terrazzo, marble and grout, carrying the bioactive enzymes along to accelerate cleaning. As the bioactive enzymes digest food soils, they reduce odor caused by decay. Also, the bioactive enzymes reduce slippage as they digest the oils and greases that make quarry tile slick. As an added benefit, as excess Easy Clean is flushed down the drain, the bioactive enzymes go to work on soils and greases present in the drain. Floors cleaned with Easy Clean provide positive traction and result in a cleaner, safer work environment.

### Features/Benefits

Highly Economical	.....	Highly Economical
No Harsh Caustics	.....	No Harsh Caustics
Unparalleled Cleaning Power	.....	Unparalleled Cleaning Power
Safer Work Environment	.....	Safer Work Environment
Improved Sanitation Perception	.....	Improved Sanitation Perception
Labor Savings	.....	Labor Savings

### Directions

For daily cleaning of quarry tile or other porous flooring: dilute one ounce of Easy Clean per gallon of warm water. Apply solution liberally onto floor surface with a mop and allow solution to stand on floor surface until solution penetrates soils. Agitate floor surface with mop. For heavily soiled areas use deck brush or machine scrub as needed. Squeegee excess solution toward floor drain. Discard mop water down drains to reduce grease build up and eliminate odors.

### Safety Information

#### KEEP OUT OF REACH OF CHILDREN

**CAUTION:** May cause eye and skin irritation. Avoid contact with undiluted product. In case of contact with skin, wash with soap & water for 15 minutes. If irritation persists, seek medical attention. In case of contact with eyes, flush with plenty of water and seek medical attention.
