**Tall Tower Challenge**

**What you need:** All of your Numberblocks One to Ten blocks.

**How to play:** First, ask your child to build each Numberblock. Then see how many Numberblocks you can stack on top of each other before your tower topples over. After you add each Numberblock, count the total number of blocks and say the new sum: Numberblock 6 plus Numberblock 4 is 10 blocks!

**Add an extra challenge:** Try to find shortcuts to counting – can they remember what 6 and 4 is, or the previous total, and count on from there? Or keep making tens as you go up: 7 and 3, 8 and 2, and so on. For extra fine motor skills practice, add blocks one at a time.
