

Numberblocks Castle

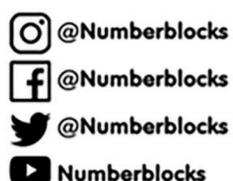

What you need:

- 1 shoebox
- 4 rectangle boxes
- Cardboard sheets
- 1 sheet of black paper
- Double-sided tape
- Safety scissors
- Pencils
- Cube shapes to draw around

What you need:

- (1) Starting with your shoebox, place a rectangle box on each corner. Measure and cut out each rectangle to fit over each corner of your shoebox. Use your double-sided tape to stick and secure your castle towers.
- (2) Take your cubes or a ruler and draw the battlement design for the top of your towers. Measure the bottom of each battlement and make 3 cuts of equal distance to fold into a square. Use double-sided tape to stick your battlement square to the top of your towers.
- (3) To create the walls of your castle, take 4 sheets of cardboard and measure the battlement design on each 1. Make 2 cuts on the left and right sides and fold them into rectangles. Stick them to the sides of your castle.
- (4) Using your cubes, measure and cut out your door frame. Stick your frame to the front of your castle. Using the inside of the door as a stencil, cut out the entrance by cutting through the shoebox at the top and sides only. This will create the castle bridge.
- (5) Measure the length of 1 cube and cut out enough squares to cover the outside of your castle.
