VIDsigner

Always be yourself

The safest and easiest way to obtain electronic signatures

Electronic signature with SAP

Electronic signature with SAP

Thanks to the integration of **VIDsigner's electronic signatures with SAP**, it is already possible to obtain the signature to your documents within your **SuccessFactors, Business One, By Design, S/4HANA** and **ECC** solutions **from the SAP system** and with lower costs.

01

✓ It solves the custody of documents with the ERP's document management automatically.

✓ It automates the entire delivery, performing the issuance, signatures and custody unattended.

✓ It uses SAP Masters to collect information needed to invoke the signature process: employees, documents, customers, suppliers and contact persons.

✓ Globally observe the signature process from the ERP itself and receive a notification when it is finished.

VIDsigner´s keys features

Streamline resource planning

02

✓ Invoking document signature process from any SAP transaction (GOS supported).

✓ PUSH notification to the applicant of the signature process.

✓ Automated sending to signature capability for documents issued from SAP.

✓ Configuration of signature scenarios by SAP business object.

✓ Management of document custody by signing in the SAP ECC.

✓ Detailed process logging from SAP.

✓ Global vision of the signature process from a central monitor.

✓ Access control by authorisations and SAP roles.

Added value of SAP integration

Direct integration of VIDsigner's digital signatures into SAP management

03

Total Accessibility

History of the documentation processed.

Allows you to enter comments to the procedures.

Data of the transaction associated to the document.

Ease to locate the necessary support documentation, include it in the original document, sign it and log the signing process.

Efficient process
Automated data capture for fast and accurate data entry, push notifications.

Error elimination
Saves time in searching and sorting, eliminates paper use and frees up physical space.

Look & Feel SAP
Friendly access and familiar look & feel.

Differences vs integration with other signature solutions

Everything happens within SAP → → → → → → **Better user experience**

From the people who send documents to sign	From all SAP users
✓ No additional training or change management required. Everyting happens within SAP.	✓ Document storage and retrieval occurs within SAP.
✓ Greater process flexibility – SAP as a platform allows the development of any functionality / workflow in an integrated manner.	✓ The evidence of the signature is self–contained in the document itself and therefore within SAP. Allows independence from the service provider in case of legal proceedings.

05

Benefits of being a Validated ID partner

✓ Growing market, with a high demand

✓ Increases the value of your solution

✓ Easy integration via Rest API and better experience

✓ Easy upselling and cross-selling

✓ Channel partners program: business plan, free signatures, and comarketing

Benefits SAP partners

✓ **Recurring market** (connector, signature packages, settings)

✓ **Easy implementation** - Integrated solution

✓ **Upsell** and **cross-sell** of consulting services

✓ Use of the **platform for your own developments** (SAP and non-SAP environments)

✓ **Reactivation** of the relationship with your **customers**

07

Validated ID
