Work Experience

Daftcode / Senior Product Designer

NOVEMBER 2016 – PRESENT

Working at a venture building company has taught me to listen effectively to users and appreciate how important it is to place them at the center of the design process, right alongside the business goals of the startup. I deliver high-quality designs, prototypes and tested solutions because I believe that the design process is crucial in delivering successful products.

Agencja Plej / Web designer, Digital Art Director

MAY 2013 – OCTOBER 2016

I was responsible for creating digital solutions for clients of the agency. As a lead designer I was given the opportunity to control the creative process and cooperation with various clients. This taught me to address their business goals, create products that reflected their brand identity and answer client needs.

Weblify Sp. z o. o. / Web designer

2009 – 2012

I was responsible for creating the brand identity, website and mobile app for Lokter startup (geolocalisation social media). In addition to this I worked on a variety of other web design projects, ranging from landing pages and admin panels to animation explainers.

Startup Kumulator.pl / Junior Web Designer

2008 – 2009

Kumulator was an e-commerce platform for group purchases, I was responsible for designing the website and admin panel.
