

# MEDIAZEL

BY FYB PTY LTD

The FYB MediaZel provides users with an intuitive, online interface enabling them to easily upload, manage and share your organisation's media items such as photographs, illustrations, audio and video stored within Micro Focus' Content Manager

Using the FYB MediaZel will provide the following benefits:

- ▶ Simple deployment and upgrade process reduces technical resourcing
- ▶ Streamlines the storage of your media items in a central location, reducing storage costs
- ▶ Intuitive interface, requiring no training, reducing the cost of deployment
- ▶ Upload media items, from any location, on any device making your team more productive
- ▶ Access media items, when you need it, anywhere anytime, so you can respond more efficiently to customer requests

### Version 7.2.8 Features

- ▶ Intuitive interface for quick and easy searching and navigation, including thumbnail search results with infinity scroll
- ▶ Drag and drop, and multiple upload functionality that detects duplicates on upload
- ▶ Integration with Google Vision to provide an auto image classification service that will automatically pre-populate the tags on media items as they are uploaded
- ▶ Integration with Google Speech and Microsoft Speech to Text to transcribe audio files on upload and pre-populate tags
- ▶ Automatic capture of EXIF metadata including GPS coordinates
- ▶ Ability to add and update GPS coordinates, navigate to a map view of the item's original location and search for images within a selected GPS range
- ▶ Video and audio streaming
- ▶ Add image restriction notifications from the admin console
- ▶ Add media items to your favourites
- ▶ Add tags or labels to media items to allow items to be grouped together
- ▶ Create multiple annotations for an image with the ability to specify which to download
- ▶ Ability to display related records for a media item
- ▶ Ability to share single or multiple media items via a URL link
- ▶ Convert file type and select resolution prior to downloading media items
- ▶ Adobe CC Connector (available for Illustrator, Photoshop, InDesign)
- ▶ Ability to upload a watermark overlay that can be downloaded onto any image
- ▶ Intuitive admin console, online help centre and usage statistics
