Certified UX Designer

CareerFoundry

Sep 2018 - Jul 2019

Recommendations

Behrad Mirafshar

Bonanza Design

Michael is a joy to work with. I've relied on him several times in certain sensitive situations that I needed a designer to take over and lead the project to fruition. He's a crafty and strategic designer at the same time that is obsessed with overall delivered experience. I highly recommend him.

Julian Weinmann

BCG Digital Ventures

Michael did a fantastic job on SB24 and helped us build the customer facing frontend for our lead generation platform. As a PM it was a great pleasure working with Michael - he is motivated, fast and thinks critically.

Nikolas Konstantin

Onyra

Michael's UX leadership helped us to put user-centered design at the core of how we work: As a facilitator in design thinking workshops he helped us to tap into the team's collective intelligence. As a designer, he was able to deliver in design and execution alike (he knows the ins and outs of webflow, a design-centered tool for website building).

Klaas Krüger

Handly

We were happy to have Michael work as a freelance UX/UI designer for Handly for 4 months. He fulfilled his tasks reliably and with professionalism. He shows a high sense of creativity and analytical skills. His design work enabled us to get to the point of starting with the development of the app.
