

FDP Metadata - Repository metadata

* Required

FDP Metadata - Distribution metadata

Title *

Title, or name, of the distribution. Ex.: Clinical trial dataset in XML, COVID-19 WHO CRF dataset in RDF, etc.

Your answer

Description

A textual description of the distribution. E.g., "The RDF distribution of the COVID-19 WHO case report form data for hospital X".

Your answer

License

The URI of the usage license for the distribution. E.g., <http://rdflicense.appspot.com/rdflicense/cc-by-nc-nd4.0>

Your answer

Issued

The date when the distribution was first issued.

MM DD YYYY

__ / __ / 2020

Modified

The date when the distribution was last modified.

MM DD YYYY

__ / __ / 2020

Download URL

The URL to download the file. Only use it if there is a file to be downloaded.

Your answer

Access URL

A URL of the resource that gives access to a distribution of the dataset. E.g. landing page, feed, SPARQL endpoint.

Your answer

Media Type

The media type of the distribution as defined by IANA [<https://www.w3.org/TR/vocab-dcat-2/#bib-iana-media-types>].

Your answer

Format

The file format of the distribution.

Your answer

Byte Size

The size of a distribution in bytes.
