

# People First, Technology Second.

## Who is our ideal client?

Any business that is wanting to implement an easy drug testing program for pre-employment, random screenings, and post workplace incident testing.

## The ShareTek Difference

### DNA Confirmed

Innovative testing of matching DNA from a cheek swab to DNA from urine allows for remote testing with validity. No in person collection is necessary, which allows for privacy for potential and current employees.

### Easy Collection in 3 steps

Observe the employee perform the oral swab on video or in person. Client will then provide their own urine sample into collection cup. This process requires no observed collection and allows clients to provide sample at their own discretion. Have the employee drop off the prepaid overnight package to any UPS.

### Extensive Testing Panel

Our testing program allows an organization to create a custom panel for over 100 different substances. This can include alcohol, prescription drugs, illegal substances and even synthetic urine.

### Rapid Results

Toxicology results are available within the HIPAA Compliant portal within 48 hours of the sample being received. This secure portal allows for package tracking and notification of delivery, receipt, and when the results are available.

## Benefits for Employers

Faster. Confidential. Proven

### Safer Workplace

A workplace study showcased that after implementing a comprehensive employee drug testing program The Southern Pacific Railroad saw a 71.2 % decrease in accidents within a year.

### Reduction in costly workplace accidents

50% of workplace accidents are caused by drug abuse according to the U.S. Department of Justice. According to SAMSHA an employee who uses drugs is 5 times more likely to file a workers' compensation claim.

### Decrease absenteeism

According to SAMSHA, an employee who uses drugs is 2.5 times more likely than co-workers who do not use drugs to be absent for 8 or more days each year.

### Lower workers' compensation insurance and healthcare costs, including premiums

According to SAMSHA an employee who uses drugs is 3.6 times more likely to be involved in an accident at work

### Reduce employee turnover

An effective tool to identify high risk hires and assist in reducing future turnover.

### Comply with state or federal regulations

This customizable program allows employers to meet state and federal standards for drug testing.
