

PHOTOGRAPHY

In a world that not only lives in the moment but also wants to capture every moment, the demand for quality photographers is unprecedented.

Whether you enjoy the artistry of painting with light or capturing the world around you in timeless images, our photography course is where you can truly develop into the professional you dream of becoming.

Our course will give you the skills required to pursue a multitude of possible careers in photography, from capturing a wedding, anniversary or just a party-to-remember, or putting together a brochure or business document that demands high-quality photographs. The possibilities for a stimulating career are endless.

Fashion and food magazines, as well as newspapers, are always on the lookout for new talent. Or you could open your own studio and photograph babies and families looking to capture their special memories. If you can dream it, we'll give you the skills to shoot it.

The software programmes used in this course include Photoshop and Lightroom.

The one-year **Further Education and Training Certificate in Photography** is a fully comprehensive programme designed to qualify you in the technical and business aspects of this dynamic industry.

There are field trips during the year which will expose you to different styles of photography as well as different lighting techniques. You will also have the opportunity to showcase your work at the year-end photography exhibition.

The following subjects are included:

- Photography Practice
- Digital Editing - Photoshop
- Photography Theory
- Academic Literacy
- Professional Development
- Work Integrated Learning
