Maya Hatch and researchers from the Physical Medicine & Rehabilitation Department &
The Reeve-Irvine Research Center at the University of California, Irvine present:

A NOVEL BALANCE ASSESSMENT OUTCOME FOR INDIVIDUALS WITH SPINAL CORD INJURY

The Details:
For more information, please contact the study investigator
Maya Hatch
(714) 456-6668 or
Email: hatchm@uci.edu

The study will take place at the Reeve-Irvine Research Center on UC Irvine’s campus.

Participation will include 2 visits of 1 hour or less over 2 weeks

As part of participating, you will be asked to perform 8 leaning tasks while being recorded by 2 devices.

You will be paid for your participation in this research as follows $120 per visit in visa gift cards.

If you participate, there is no anticipated direct benefit.

Be part of a research study that will help develop a new seated balance outcome assessment in individuals with SCI!

You are eligible to participate in this study if you

- Are 18-65 years old
- Are English speaking
- Have a primary diagnosis of chronic SCI (>12 months)
- Have SCI between T1 - L 2
- Are AIS grade C or D
