WELCOME TO PCH SERVICES

PCH Services has over 10 years of expert cleaning experience. Our mission is to bring out the true aesthetic value of your home or business while being a model of efficiency, lasting relationships and fair quality pricing.

Our clients tend to be lifetime, dedicated customers because of our punctuality, quality of work, enthusiastic positive energy and generously competitive pricing.

We look forward to doing the same for you.

OUR EXPERTISE

Window Washing:

Clean windows are the most impactful detail in making your home or business shine. Leave the unpleasant window cleaning tasks to the expert team at PCH Services, where the difference in service is crystal clear.

Solar Panel Cleaning:

Get the most value from your solar panels by keeping them squeaky clean and free of dirt and debris. Trust us to regularly and properly clean your solar panels for maximum power output.

Power Washing:

Tile roofs, patios, driveways and walkways are all subject to a build-up of seasonal sediment and the growth of unhealthy and destructive mold. PCH Services keeps your property clean and healthy through our skilled pressure washing services.

Center headline:

PCH SERVICES

We provide exceptional work at competitive prices,
while building a loyal family of clients.

Exceptional Window Cleaning:

Tired of looking through dirty windows at your home or office? Worried about your family's respiratory health during allergy season and dusty summers? Allow the fully qualified and expertly trained team from PCH Services to put those worries to ease.

- All glass is cleaned inside & out
- All screens are thoroughly cleaned with a water solution
- All tracks are vacuumed, wiped, sprayed & lubricated by hand
- All window frames & sills are wiped down by hand

Heated Pressure Washing:

We remove those unsightly black stains on the side of your house from excessive water run-off. We remove cobwebs and debris from overhangs, wash all of the dirt and dust buildup on sidings and stucco, and remove the black/green algae from concrete patios, walkways, roof tiles and driveways.

State-Of-The-Art Solar Panel Cleaning:

We remove all the layers of accumulated dust and salt sludge from the surface of your solar panels. We use a full de-ionized water-fed brush cleaning system, which cleans both the panels *and* their frames, and we perform a full visual inspection of all of the exposed hardware on your solar system. While on the roof, we also do a walk-around and inspect for broken tiles. After cleaning, customers receive up to 30% more solar intake on their panels.

Gutter Cleaning:

Are you growing a mystery garden in your gutters? One that attracts unwanted mosquitos? We can remove all of the leafy, dirty debris from your gutter alleys while making minor adjustments to their pitch to improve water flow. We will flush out all of your downspouts and will reinforce and remount any gutters that are hanging off of the roofline.
