Frog Design Inc.

2.13.2021

Greetings,

I write today in regards to the position of Visual Designer II. Frog, well known for innovation in design, has been an inspiration of mine even before I knew the name. A life-long student of Apple's design, the work of Hartmut Esslinger and Frog shaped my perception of what design is.

The deadline-oriented, project-ready position and opportunity to work with a team of fellow creatives is very exciting to me. It would be an honor to collaborate with fellow frogs on projects across the digital and print mediums.

I hold a Bachelor of Arts in Graphic Design with a Minor in Information Systems from Lee University. Thus far in my career, I have accrued valuable experience creating pieces for the print and digital mediums, overseeing projects from conception to production, crafting brands, maintaining strict deadlines, managing a team of fellow designers, collaborating on user interface, managing websites, photographing events, and more. I have been able to use my detail-oriented personality and strategic mentality to tackle any project. My time serving as a designer in publications and working for three years at a startup has equipped me to function well in a fast paced environment and to meet tight deadlines while still being able to take a step back and see the bigger picture.

It would be an honor to discuss how I might serve in the Visual Designer II position and as a fellow frog. Please feel free to contact me with any questions or for any additional information. Thank you for your time and consideration.

Sincerely,

Josh Roden
