

## Remote Working Assessment

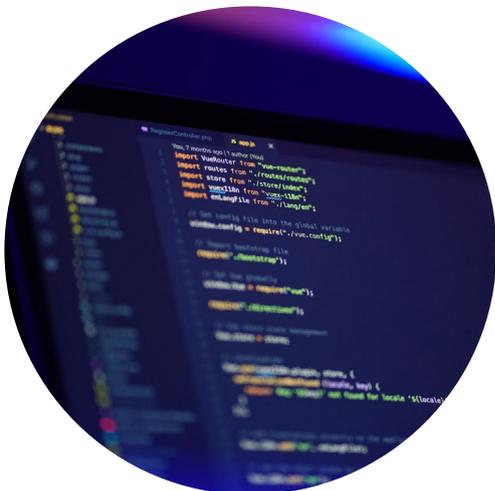

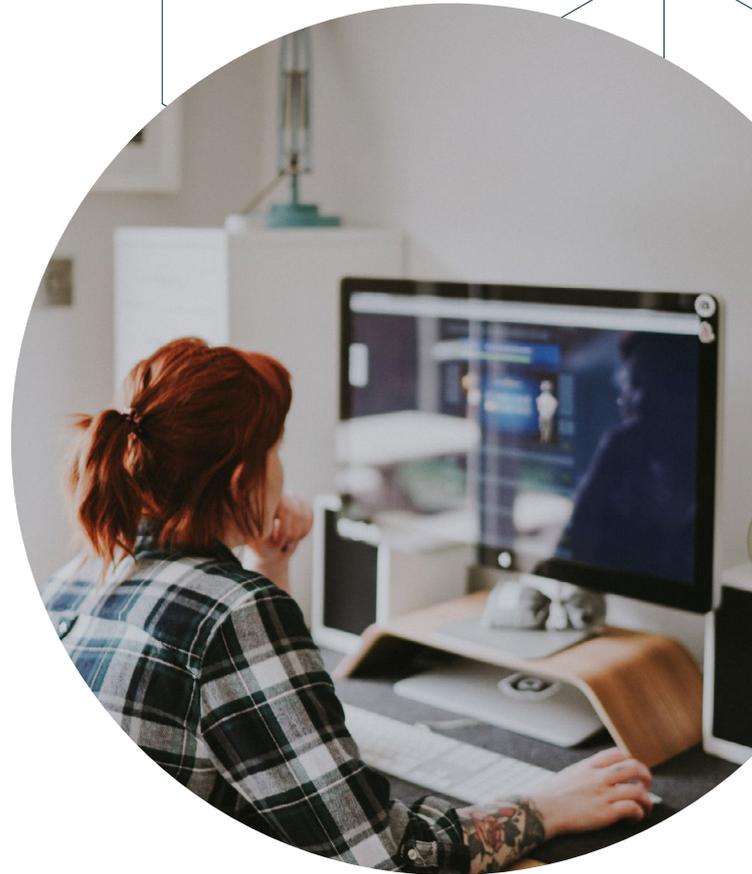

### Why is a remote working assessment a good idea?

While remote working is nothing new, the pandemic certainly accelerated its growth and with it a greater acceptance of hybrid working patterns: staff can now work in the office or from home or from both, and such flexibility is expected to become the norm.

The move to hybrid, however, creates an expansion in the attack surface of many businesses, with vulnerabilities around:

- Bring your own device (BYOD)
- Connecting to public wifi networks
- Phishing attacks
- Ransomware

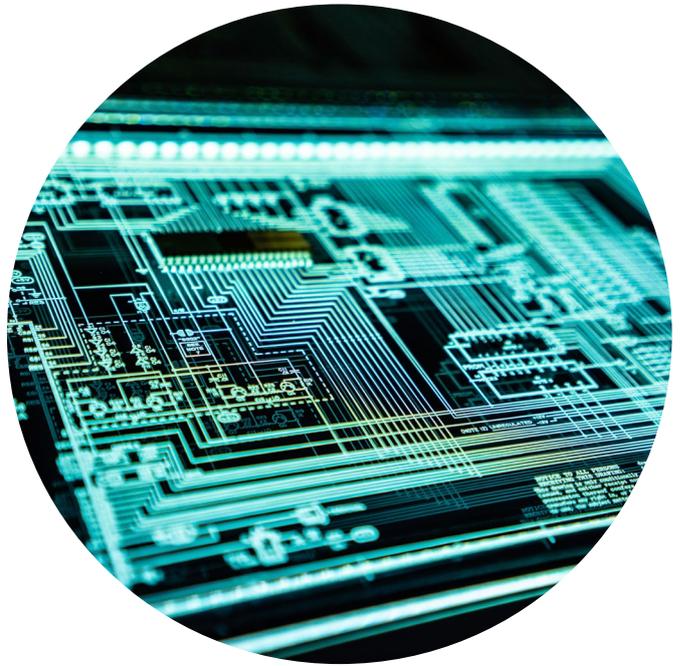

The upshot is a heightened risk of malicious threat actors gaining access to your sensitive data through the successful targeting of teleworkers.

### Why remote working assessments from CCL?

Our CCL remote worker assessment is designed to identify the presence of any security vulnerabilities that may be exploited to ensure that your remote workforce is secure as possible. Our approach and skillset combine to provide the requisite degree of thoroughness for optimal protection and peace of mind.

Our infrastructure, VPN, cloud, end user device review and phishing assessments can help to identify areas where cybersecurity needs to be improved, and allow businesses to maintain full confidence in their hybrid working arrangements.

**The service comprises:**

- Scoping call with senior consultants to establish your requirements
- Proposal and price quotation
- Testing phase and project management
  - External infrastructure test of systems providing access for remote workers
  - Testing Virtual Private Network (VPN) solutions
  - Configuration reviews of systems used by staff to access resources remotely
  - Firewall rules for remote workers accessing internal resources
  - Laptop Assessment
  - Phishing Assessment
- Comprehensive report and review
  - Executive summary setting out the main risks identified
  - Recommendations and improvement plan

**Top takeaways**

A clear lens on the threats and risks to your systems

Services tailored to each client’s needs and requirements

Price certainty from the outset, multi assessments per year negotiable

Affordable, repeatable and light-touch service to sustain strong cyber posture

Comprehensive reports with clear intelligence and pragmatic guidance

All consultants security cleared and certified under CREST, Tiger Scheme or Cyber Scheme

A cyber specialist rooted in standards - ISO 27001, ISO 9001, CEH, IASME, CREST, CHECK

CCL Solutions Group is one of Europe’s leading digital forensics, discovery and disclosure, and cyber security specialists.

Our suite of Cyber Services has been designed to give clients all the expertise, responsiveness and assurance they need in the face of increasing cyber risks. The onus is on transparent service offerings and price certainty, the outcome, total peace of mind.
