ATTENTION - PLANT BOX LARGE

This Plant Box is made from a powder-coated metal that has been given an anti-rust treatment, and is suitable for outdoor use.

Do be aware, however, that just as with any metal, prolonged outdoor use and exposure to the elements will cause the Plant Box to develop rust over time.

We therefore advise you to bring your Plant Box inside during cold weather – particularly if the temperature drops below freezing – and to regularly empty it for excess water.
