

# cathedral window fussy cut guide

2½" fussy cut on point

▶ watch video

## Arabesque

### How to use:

Print out page. Make sure your printer is set to 'no scaling' and that the scale square measures exactly 1" square.

Cut out the outer square, then the central window and each of the [4] grey rectangles.

Place the square onto your fabric, and move around until you can visually centre the fussy

cut to your satisfaction.

Mark the fabric with a fabric marker inside each of the four rectangles and also in each of the [4] points of the window .

Remove guide, then connect dots and marked lines with marker to form an on point square.

Now cut out your fussy cut with confidence!
