

Be Part of Historic Investments

OCED is making more than \$21 billion in clean energy investment decisions across multiple technologies that will unleash hundreds of billions in private sector investment to achieve our net zero carbon goals by 2050—and we need your expertise.

Join Us as Merit Reviewers

To inform OCED’s significant investment decisions, we need to assemble a team to serve as independent merit reviewers with a range of skillsets and expertise to select projects for competitive funding opportunities. We are looking for reviewers with expertise in technology commercialization readiness and risks, project development and management, project finance, permitting and regulations, and energy and environmental justice.

Help us tackle the significant impacts of climate change by serving as a merit reviewer for these once-in-a-generation clean energy projects. Your experience and knowledge will enable you to provide helpful advice to OCED on the merits of proposals and constructive comments to proposers that strengthen their projects. Merit reviewers will prove invaluable to OCED in the identification of meritorious projects.

Learn More

If you are up for the challenge and looking for something to do in your spare time for a few weeks, sign up on the OCED Exchange portal via the link below. We provide training, paid honorarium for your hours of service, and any travel needed. As a merit reviewer, you will work with a dynamic team from across the Department of Energy as well as other clean energy experts. Your expertise can provide impact on billions of dollars of federal investments for clean energy projects. Come join our team!

OCED Scope

**Regional Clean Hydrogen Hubs
(\$8 billion)**

Upgrading Grid Demonstrations (\$5 billion)

**Carbon Management
(\$3.5 billion)**

**Energy Improvements
in Rural or Remote
Areas (\$1 billion)**

**Long Duration Energy
Storage Initiative
(\$505 million)**

**Advanced Reactor
Demonstrations
(\$2.5 billion)**

**Industrial Emissions
Demonstrations
(\$500 million)**

**Clean Energy
Demonstrations on
Mine Land
(\$500 million)**

OCED’s mission is to deliver clean energy demonstration projects at scale in partnership with the private sector to accelerate deployment, market adoption, and the equitable transition to a decarbonized system.
