

Client Engagement Process

01

Exploration & Discovery

We begin by leading your team through our information gathering process. This thorough discovery phase ensures alignment and understanding of your brand's identity, needs and budget.

02

Solution Design

We dive deep into designing your custom-tailored solution. With consideration for overall concepts, placement, timeline and budget, our team crafts recommendations specific to you.

03

Strategic Planning

We want to ensure your advertising is successful. So we assign you a dedicated account manager that enables your creative team to build the best content for your exact hardware setup.

04

Delivery & Launch

When your technology package is ready to ship, we make sure a certified technician is there to install at a time that is most convenient for your business. Zero disruption is our goal.

05

Support Services

Once installed, we're still by your side. With warranties on all hardware, 24/7 remote monitoring, online tutorials, and a responsive help desk, we'll always have your back.
