Fold 1:

We cover all the bases for you to ace Facility Management:

Process: Digitize procedures, automate workflows, and monitor actions to breathe life into day-to-day management activities.

Technology: You get the best-in-class tech to ensure compliance through the spectrum of devices and platforms.

Data: Data capture of 28 different types gives you 28 more ways to track and manage assets. Say bye to data capturing issues.

People: Drive accountability by monitoring employee productivity and improve customer satisfaction by converting client issues into solutions and actions.

Fold 2: Ensure high standards of compliance

All the tools you need for the job:

Put accurate data, forensic checks, robust checklists, and ad-hoc inspections to implement the gold standards of facility management.

Keep the data consistent:

Make the facility management system your eyes and ears by capturing data from virtually every point.

Access information anytime and anywhere:

Manage operations on the move by logging-in from various devices and platforms. Leverage this virtual presence to efficiently manage operations while adhering to all the post-pandemic norms.

Fold 3: Build direct relationship with customers

Strengthen customer relationships with concrete proof:

Keep the proof of work readily available for customers with personalized and intuitive dashboards to improve customer satisfaction.

Put the customer in control:

Give one more reason to customers to be your word-of-mouth publicists by letting them access data relevant to them. Show them how you are expertly managing their tasks and build trust.

Fold 4: Improve service quality and drive accountability

Use inspections to elevate the quality of service:

Leave no stone unturned in streamlining facility management operations with vigilant and easy-to-conduct inspections. Create checklists to ensure further compliance from the on-ground workforce.

Impart accountability among staff:

Delegate tasks with ease and stay in control of who goes in and out of the system. Generate evidence-based performance reviews and nurture a culture of accountability and quality work.

Fold 5: Manage on-ground teams on scale

Scale and manage the on-ground team with ease:

From infallible authentication to providing data access on a need-to-know basis, managing ground teams becomes a breeze with One Resource.

Keep your priorities straight:

Stay ahead of the problems using intuitive dashboards that let you know which matters you need to tend first. Create custom dashboards and reports for a better grasp on priorities.

Fold 6: Roll out and manage processes 4x faster

- **Launch processes faster:** Bring down the development time from months to weeks to digitize operations quickly.
- **Work cross-device:** Transcend beyond devices and platforms to manage operations from iOS, Android, and Windows smartphones and desktops.
- **Manage change 8x faster:** Act fast on customer and internal inputs to implement changes at an 8X faster pace.
- **Reduce infrastructure cost:** Bring down the cost by saying goodbye to resource-heavy legacy systems and manual processes.
- **Protect against technology churn:** Enjoy the best-in-class tech with frequent updates and feature additions to the platform.
- **Connect to existing ecosystem:** Fret not about creating solutions from scratch since you can seamlessly integrate our solutions with your existing infrastructure.

Fold 7: Support at every step

From ideation to deployment, we stay with you at every step of the low-code journey and provide assistance when needed. We do all the legwork so that your business can run past the competition.

Get in touch with our low-code experts to firsthand experience our world-class support.
