ANSWERS ADAPTED TO A DIVERSITY HIGH-RISK SITES ENVIRONNEMENTS

THE BAUMERT CHOICE

MAXIMUM PERFORMANCE FOR THE WHOLE RANGE OF PRODUCTS

From standard equipment to customized systems, Baumert offers the choice of a range made in France, capable of excelling against all types of risks.

AGIL MODULAR DOOR

Our range of AGIL technical doors offers evolutionary performances specially designed to meet the constraints of HIGH-RISK sites.

Packs designed for the specific constraints linked to your sector :

- Nuclear Pack
- EDF Pack
- Defense Pack
- Security Pack
- Customized Pack

TECHNICAL DOORS

Baumert uses all its know-how to offer you technical doors for the most demanding industrial and HIGH-RISK sites, whatever the performance required for your project. We design our products so that they can withstand the highest safety constraints, and we install them in any type of environment, even the most complex.

VARIOUS PROTECTIONS

Hatches : Whether used to cover a physical opening or an outlet opened once a year for maintenance purposes, our hatches are customised in all dimensions to suit your needs and your performance requirements perfectly.

Wrapping : Baumert offers a unique solution for flexible fire protection of cable trays and air ducts (HVAC) in high-risk environments, and work on construction sites all over the world.

Partitioning : Our customised technical partitions enable sectorisation adapted to your requirements and performance needs, whether it involves resistance to fire, earthquakes, gamma rays or flooding.

Radioprotection : Simple, flexible, easily transportable and manufactured in France on request, our lead blankets weigh less than 25 kg and allow for a 35% mitigation of gamma rays for optimal radiation protection.
