## Scaffolding

AXIS specializes in access solutions, including scaffold erection, demolition, and specialty applications. Scaffold is a critical component to other industrial projects including plant maintenance, turnarounds, outages, and capital projects.

Our clients rely on us to assemble, proactively manage, and disassemble access equipment on time, on budget, and with no safety incidents. Our management team of highly skilled professionals monitor all sites and projects to ensure work is done safely and correctly.

AXIS is committed to providing our customers a superior scaffolding service by using the most advanced systems and materials.

## Insulation

AXIS insulation services includes thermal insulation, temporary covers, and removable blankets. Our team of experts can install several types of insulation in support of capex projects, maintenance, and turnarounds.

Proper insulation can produce cost savings and energy efficiency for critical process equipment. The AXIS team can maintain your insulation needs to prevent corrosion and failure.

Our services include design, fabrication, and installation for all types of insulation.

## Fireproofing

AXIS provides fireproofing services specific to your project, including application, removal, and repair. We ensure the proper fire protection systems are in place for mission critical equipment. Our team works to meet the stringent fire codes and to maintain a safe work environment for our clients.

Our team of fireproofing specialists are trained in multiple fireproofing applications and can meet the needs of different industrial environments.

## Abrasive Blasting & Painting

AXIS provides clients various coating services, including abrasive blasting & painting. Our team ensures the proper coating applications are in place to extend the useful life of critical process equipment.

AXIS has a dedicated off-site painting yard to assist clients with their various coating needs. Our team of craft specialists are highly skilled and trained to support various projects. From the planning phase, to schedule and budget, AXIS works side-by-side with our clients to ensure projects are done on-time and as efficiently as possible.

## Abatement

AXIS specializes in asbestos, mercury, and lead abatement within various industrial environments. Our craft specialists can address any specific abatement project.

Managing complex safety regulations can be a challenge to our customers in order to maintain a safe work environment. The AXIS team works closely with our customers to address any issues related to abatement.

# Safety Program

- 12 years and over 4 million man hours with no lost time incidents
- Recognized as the safest scaffold organization on the Exxon / MHIA site with 3 years and over 500,000 incident free man hours
- Current EMR 0.54
