

# THE FIRST RAIL CYBERSECURITY ECONFERENCE

Event | April 30, 2020

## CERVELLO TO HOST THE FIRST RAIL CYBERSECURITY ECONFERENCE, WITH INDUSTRY THOUGHT LEADERS

On April 30th, in the midst of COVID-19 lockdown period, we had the pleasure to host the first Rail Cybersecurity eConference. It was such an honor to welcome close to 100 colleagues and partners, and discuss top-of-mind cybersecurity challenges, insights and views on the future of the rail industry in light of Covid-19. It was great to be joined and supported by so many rail professionals representing leading vendors, OEMs and operators from the US, Europe and APAC – including Thales, CFF (SBB), Deutsche Bahn, ST Engineering, Siemens Mobility, Akka Technologies, ÖBB, Marubeni Corporation, Toshiba Corporation, Hitachi Rail, Network Rail, Land Transport Authority (LTA) Singapore, CAF (Construcciones y Auxiliar de Ferrocarriles), New York City Transit, Airbus CyberSecurity, Expandium and more. We were honored to have speakers from Thales Transport, DB Engineering & Consulting and CFF (SBB), who shared their experience in dealing with the current pandemic, the impact on business continuity and the similarities to cyber security challenges.
